WWW.CRANVIEWGELBVIEH.COM

Welcome to our “Genetic Progress” production sale! Thank you to our repeat customers for your confidence in our program.

It has been a challenging year for us. In December, we lost our partner and our best friend “Dad”. Our operation still has the same great cows it had before but they miss the guy that kept them fed.

As you look through our catalog, you will see the extent of our embryo transplant program. There are only three animals in the whole sale that are not affected by our ET program. We continue to intensify our ET work to bring commercial customers the best genetics we can produce in multiple packages. It allows us to perpetuate our female genetics a lot quicker. As a result, our commercial and purebred customers can take advantage of these genetic packages in the form of bulls and a few select females.

As we have done in the past, we will continue to provide performance and carcass information to assist you in making your purchase decisions. Not only do we feel it is important to you, we use this information to select our replacement females and to identify any potential herd sires to use in our herd.

For those of you unable to make our sale, we offer the opportunity to purchase on line at DVAAuction.com. If you plan to use this service, register early. We can also make other arrangements if DV Auction is not an option.

If you elect to purchase bulls or heifers sight unseen and they are not as we represent them, we will guarantee your purchase. Every effort will be made to arrange the most cost effective transportation for your animals. We offer free delivery in ND and the three surrounding states. Anyone spending more than \$10,000 will receive free delivery.

Thanks again for your confidence in our program. Contact us if you have any questions. We appreciate your support!

Sincerely,

Rob & Bill Arnold

GENETIC PROGRESS BULLS AND FEMALES

CRANVIEW GELBVIEH IS RETAINING 50% SEMEN INTEREST IN ALL BULLS SELLING.
BUYER GETS FULL POSSESSION AND 50% SEMEN INTEREST WITH YOUR PURCHASE.

ONLINE VIDEOS: View online videos of all animals selling at www.cranviewgelbvieh.com or www.mms.bz.

HEALTH: All bulls and females sell as guaranteed breeders. Due to our sale being 2 weeks earlier this year, the bulls will not be semen tested. Please have bulls semen tested prior to turning out for this breeding season. Scrotal measurements will be supplied on the supplement sheet sale day. All animals selling will sell with a valid health certificate for shipment in the continental United States. Any special testing needed to get into certain states will be done by Cranview Gelbvieh prior to shipment.

TRUCKING: Cranview Gelbvieh is offering free nationwide trucking on all purchases of \$10,000 or more per ranch. For complete details please contact Rob Arnold of Cranview Gelbvieh or Mitchell Marketing Services.

GENOMIC ENHANCED EPDS

THE MAJOR BENEFITS OF GE EPDS ARE: risk reduction through improved accuracies, value of time to assess breeding stock at a younger age, increased rate of genetic progress, and getting data on economically important traits which are expensive or difficult to measure. Most of the bulls and Females selling have GE EPDs and it is denoted just above or below the EPD box in the sale book.

SALE BOOK EPD EXPLANATIONS

CALVING EASE DIRECT (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled in his herd.

BIRTH WEIGHT (BW): Predicts the difference, in pounds, for birth weight of the calf.

WEANING WEIGHT (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

YEARLING WEIGHT (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

MILK (MILK): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

TOTAL MATERNAL (TM): An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. As an index, this value is not reported with an accompanying accuracy. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. TM Index = MK EPD + 1/2 WW EPD.

CALVING EASE MATERNAL (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic pre-disposition to calve unassisted as heifers.

YIELD GRADE (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

CARCASS WEIGHT (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

RIBEYE AREA (REA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

MARBLING (MB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

FEEDER PROFIT INDEX (FPI): An economic selection index designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on grade and yield. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.

EFFICIENCY PROFIT INDEX (EPI): An economic selection index developed to aid producers in selecting for more feed efficient cattle that still have acceptable amounts of gain. The EPI provides slight negative pressure on intake, while keeping gain at a constant value. By selecting on this index, producers will be able to find those animals that gain the same amount as their contemporaries while eating less.

BIRTH WEIGHT IN EMBRYO TRANSPLANT (ET) BULLS SELLING

The bulls selling as a result of ET all have Genomic EPDs listed in the sale book to increase the accuracy. ET calves do not have ratios for birth and performance weights as they are raised by a recipient cow that will not give you the true accuracy for birth and performance as will the genetics. The birth weight in ET calves is completely irrelevant and has no indication as to the expected birth weights of their calves. Please use the EPDs for calving ease and birth weight to help with the selection of the bulls in the sale offering.

SUGGESTED USE FOR GELBVIEH and BALANCER® EPDS	TRAIT:	EPD WEIGHT RANGES:	EPD WEIGHT RANGES:	EPD WEIGHT RANGES:

Heifer bull here! This calf's mom is a Dam of Merit. If you look at her pedigree, you see that she is out of the BW trait leader in the Red Angus breed...the very popular Leachman Heavenly 8141 bull. Combine that with Move'n On and you have a pedigree that is built for calving ease. I know some of you buy calving ease bulls solely on birth weight but unfortunately you may miss some good ones if you do that...this would be one of those times. Trust his EPDs...he will not disappoint you. He ranks in the top 15% for BW and the top 5% for calving ease!

Unlike the past few years, we have a few more PB bulls to offer. We have tried to incorporate the strengths of the Balancer cattle into our PB population. We are satisfied that we are making progress, but we haven't reached our objective yet. I think this calf is a good indication of that. He excels at a lot of strengths that Gelbvieh are good at plus our carcass profiles continue to improve which should go along ways to keeping all of you producing industry relevant cattle. This calf is deep, he is wide based, and he comes in about a 6 frame package.

Unbelievable would describe this bulls EPD profile. Look at all the categories that he excels at not to mention that he is in the top 1% of the breed for MB, Calveing Ease Maternal, and Feeder Profit Index. If you are interested in building better cattle...take a look at this bull. He is sired by our Move'n On bull that sold in our 2010 sale. He deserves a look. He will be used in our ET program.

He is deep, he is wide, and he has a great disposition. Here again, this is one of those calves that ranks very high for calving ease and birth weight epd's but his actual birth weight might detour a few people to use him that way. He will calve very easy...it is a strength of the Move'n On cattle. This bull ranks very high for marbling amongst the PB population...he could help a lot of breeders improve carcass.

EGL TIARA T003 ET • DAM OF LOTS 9-12

LOTS 9-11 - FULL ET BROTHERS

We decided to offer the Lot 9 bull as well as his two flush brothers, even though we hate to see them go. We showed Lot 9 in Denver this year and he stood second in class to the National Champion Bull. If you evaluate these bulls from an industry perspective, they have a very balanced set of EPDs plus the carcass merit offers value. The Tiara cow was purchased in the National Sale in 2010 from Eagle Pass Ranch for \$16,000 and she is a beautiful female with a very nice teat and udder package. Crossfire is siring some very good cattle that offer the industry performance and carcass. If you are looking for a good balanced package, these bulls offer you that package.

LOTS 13-14 - FULL ET BROTHERS

We've combined some really good genetic packages here to produce these two bulls. The Evelyn cow and Crossfire produced the Z245 ET cow that we raised and the Sandhills 0065X bull which is a great performance kind of bull with very good carcass qualities combine to make these two good packages. These two calves are deep and wide with good muscle. Help yourself to two very good genetic packages that will keep you at the forefront of the industry.

If you are looking to add a little punch to your Angus based cows, take advantage of the free heterosis by crossbreeding. This calf would work well on second calf cows.

DCH HILLE ZULA Z133 • DAM OF LOTS 18-20

LOTS 18-19 - FULL ET BROTHERS

These two calves are brothers to the B415 bull. Just like him, they are very stocky and thick. As I said earlier, we rarely flush heifers but in this case, I thought the carcass value that Z133 offered was worth the chance. As you can see, these two calves offer you an excellent opportunity to make genetic improvements or sire a set of feeder calves that will excel on both quality and yield grade.

CRAN B415 • SELLS AS LOT 20

Heifer bull! This bull is a little smaller framed so if you are trying to down-size your replacements or if you have heifers that you are breeding...this calf will work great! There are several calves in the sale out of Zula Z133 with this being her first natural calf. I very seldom take embryos out of a heifer but I thought enough of this cow that I wanted to give it a try. If you have a chance to look at the calves, she stamps all of them with a moderate frame and lots of red meat. Look at the carcass merit on this calf. He scored a 9 for tenderness!

LOTS 21-22 - FULL ET BROTHERS

Both of these Lock & Load calves offer a good wide base with good muscle expression. Be sure to take a look at them on sale day!

I wish I had more Regis calves to look at. He is deep, wide and thick. He ranks in the top 3% for calving ease and the top 10% for BW...as I said earlier, do not judge this calf on his 90# birth weight if you are wondering about using him on heifers or small cows. He will work and you won't be disappointed. He is an ET calf, and he may have come out of a very large cow so you can't read a whole lot into the actual birth weight number... it's just a number. Calving ease EPD is a much better indicator of what this calf will do.

These are our first CTR Sandhills calves and they are awesome. Again, do not put too much value in their weaning weights because all of our ET calves are raised in commercial herds from SD and WY with little known about the surrogate mothers. It's a lot easier to use EPD's as a predictor than the actual values for any of these ET calves. In fact, your EPD's are always a better indicator than actual weights. Most of us breeders would do all of you a favor if we didn't publish birth weights and weaning weights.

The more Lock & Load calves I see, the more I like the bull. The dam to these two calves was sold to Eagle Pass in the National Sale. She is an extremely attractive package offering herd building carcass values. These two bulls exhibit both qualities. They rank in the top 30% for Feeder Profit Index and the top 15% for Efficiency Profit Index. Do your homework here, you have two Balancer animals with very similar EPD's for both carcass and performance, there should be some good consistency bred into this mating.

Our focus has been to increase carcass value and maintain the performance and maternal characteristics that Gelbvieh cattle are known for. It is a lengthy process and it doesn't happen in one mating but this calf is a good indication of where we are headed with our cow herd.

LOTS 36-39 - FULL ET BROTHERS

We were looking for a sire to complement our PB donor cows to improve carcass and moderate birth EPD's. Samurai has not disappointed us. All of these bulls exhibit good muscle and good growth. Look at the balance between calving ease, maternal and growth. If you are producing feeder cattle and retaining a few heifers every year, these bulls provide a good package for that.

Someone is going to get a really good buy on this dark red calf because most of you will discount him due to his WW. But, he took care of himself for most of the summer. His moma died in the pasture in late June and had he had a moma to raise him, I'm guessing this calf would have weaned easily in the 700# range. This calf will do a lot of good things for whoever owns him. He scores in the top 50% in 11 different categories...we only measure 13. We have several Samurai calves in the sale out of this mating...this happens to be her natural calf.

We own the Y077 bull with one of our long time customers in Kentucky. We kept half interest in him because we wanted a bull that offered us an opportunity to improve the carcass value in our animals as we started to breed our PB cows to Balancer bulls without sacrificing the performance that Gelbvieh cattle are known for. He has not disappointed us as you can see by the offering in this sale.

This calf represents a combination of two really good cows again (886H and Tiara T003 who we purchased in the National Sale in 2009 for \$16,000). Once again, take a good look at his carcass profile along with his performance numbers. He excels on both the Efficiency Index and the Feeder Profit Index. If you like to buy bulls based on good cows, this bull needs your attention.

LOTS 63-65 - FULL ET SISTERS

We only own 3 Angus cows but we are really proud of Princess W2. She has already produced an Opportunity son that was Reserve Champion in Denver two years in a row and a Cash son that will be producing semen for Bull Barn Genetics! I am planning on keeping one of these heifers but I'm not sure which one yet...DNA and ultrasound will make my decision.

LOTS 66-74

These heifers are all sired by "Awesome" Y077 ET. As you can see, they all excel at growth and carcass. They all have genomic enhanced EPD's for more accurate predictability. Most of these heifers are 75% Gelbvieh so one mating would produce PB's with excellent carcass traits if mated appropriately or keep them Balancers. Either way, they offer a lot of opportunity.
