

Genetic INVESTMENT Production Sale

Tuesday, March 3, 2015 • 1:00 PM (CST)
At the Ranch, Arapahoe, NE

WARNER BEEF
• GENETICS •

Welcome TO THE SALE!

Welcome Cattlemen,

It is with great pleasure that I invite all of our past customers back and welcome any new customers to the 2015 Warner Beef Genetic Investment production sale. It's an exciting time to be in the business and our appreciation to all interested in our program cannot be vocalized enough.

This offering brings you the largest grouping of Edison sons to be offered in the country. These bulls fit the industry in so many ways. Powerfully made cattle that offer tremendous rib shape and fleshing ability and maternal traits. This, coupled with high quality Sandhills sons, thick made Red Power progeny, and the balanced trait sons of bulls like Industry 301X and Mac 55Y. New and exciting sires include the calving ease bulls by Highly Focused and carcass progeny of Contract.

The females offered are unmatched. I don't know where else you can buy donors and their daughters like you can annually at this sale. The Matron 802U cow sells along with her progeny in this sale. This cow has generated thousands of dollars of progeny, but has not reached her lifetime value yet. There is unlimited potential yet to come in this female and the opportunity is yours for the taking. The open heifers are right out of our replacement pen and are a true representation of the young genetics coming through our program.

This year all the sale cattle have been DNA tested to provide Genomic Enhanced EPDs. Our intention is to provide you, the buyers, with the most accurate data available. This adds more accuracy and validity to the same EPD profile you are accustomed to. The Genomic Enhanced numbers reflect the values of what the same animal will possess after two or three calf crops. Please ask me any questions that you may have as I'm more than willing to help bring you up to speed where technology has lead the industry today.

Once again the bulls have all been ultrasounded for carcass traits and that data is available. I believe that genomics are the direction of the future and will give us more validity in time. Each and every bull offered has been semen tested and sells as a satisfactory breeder. All registrations are up to date and will be transferred to the new buyers.

Every bull is fully guaranteed for the first season. We have complete confidence in every animal in the sale. We value your business and will work in any way necessary to accommodate your needs.

About the Bulls...

View videos online of all sale cattle at www.mms.bz

Warner Beef Genetics retains 1/3 semen interest in all bulls sold in this sale.

WARNER BEEF GENETICS BULL BREEDING GUARANTEE

Each bull offered carries a full first season guarantee. This covers all injuries from feet problems, injured penis and death. For any reason that you have a concern about the health of your purchases, please call us here at Warner Beef Genetics. We do ask that if there is a problem with a bull, please notify us before disposal of a bull. This will give us the opportunity to determine the cause of the injury and correct it if possible. All guarantees cannot exceed the purchase price of the bull. We will always do our best to insure that your cows are pregnant with the best bull for you that we have available.

HEALTH

All bulls selling have passed a complete breeding soundness exam, are guaranteed breeders and qualify for the Warner Beef Genetics Bull Breeding Guarantee. Scrotal measurements will be listed on the supplement sheet on sale day.

WINTERING WARNER BULLS

Warner Beef Genetics will feed and care for your bull purchases free of charge until April 1, 2015. A cost of feed charge of \$3.00 per day will apply after April 1. We ask that trucking arrangements on females be made within a few days following the sale.

TRUCKING

Free trucking Nationwide on purchases of 4 bulls or more per ranch. All other bull purchases will be delivered within 250 miles free of charge. We will assist in any arrangements we can on female purchases.

About Warner Beef Genetics...

PROPAGATING ELITE GENETICS.

We believe in propagating breed leading genetics from our most valued and trusted cow families. Our aggressive embryo transfer and AI programs draw attention from all levels of breeders. These females are flushed to elite sires to push genetic evolution as rapidly as we can. The ability to source elite genetics from outside sources has also been very beneficial. Warner Beef Genetics has cultivated alliances with commercially focused Angus breeders to infuse the very best of Angus genetics to enhance our Balancer® program. Our secondary mission is to recreate the purebred Gelbvieh gene pool with Balancer genetics to improve meat quality and the value of feeder cattle.

LARGE-SCALE QUALITY SOURCE.

Warner Beef Genetics is confident in our ability to service the large scale commercial programs that are seeking a supplier of quality Balancer® and Gelbvieh. Warner Beef Genetics has the capability of supporting the genetic needs for any size commercial program. The similarity and uniformity of the calf crop along with our aggressive ET program adds to our capabilities.

SEEDSTOCK RAISED IN A COMMERCIAL SETTING.

The Warner Beef cow herd is built upon the same principles and values as each and every customer we have. Cattle must be able convert a large variety of forages from native pasture to low quality crop residue into beef in an efficient manner. This is a hard working cow herd that never takes a day off just like our commercial customers. This ability to compare our registered females to the commercial cow herd within the same contemporary grouping assures that our genetics can thrive in any environment.

Genomic enhanced EPDs.

It may be a strong statement but this may be the best Balancer bull we have raised to date. Outcross to all mainstream genetics at Warner Beef and right in so many ways. Dam is a donor from the Thomas Angus Ranch in Baker, Oregon and sired by Sam. There is a lot of momentum on the Sam cattle this year with a bull selling in Denver for a total value of over \$102,000. A definite herdsire candidate here in a complete package bull. This was the lead bull in our competitive pen of three bulls in Denver.

The All Business bull topped our sale a couple of years ago and we used him back on moderate framed Angus cows. The 7065 cow is now in our donor group after nursing this stud. A super long bodied bull that reads very well also. Herd Sire for sure.

The opportunity of the year in the Gelbvieh breed. Rarely does the opportunity come along to own a female of this status in her entireity. 802U is not only the mother of DLW Alumni 7513A, 2014 pure-bred futurity champion bull and all his flush brothers that went onto generate over \$100,000, but several herdsires and featured females prior. I cannot express the consistency this cow produces regardless of how she is mated. This cow will enhance the quality of any program in the country. This offering includes the natural born heifer calf sired by CTR Sandhills. This young beauty offers the buyer an instant cow family to build a youthful and proven program. Buy with confidence your only regrets will be what opportunity is missed out on if you hesitate.

Lifetime flush record: Flushed 7 times since 2010= Average of 11 frozen embryos out of 16 recovered

MS U271 3048A ET • SELLS AS LOT 144.

A definite sale feature. Notice the pedigree, here is a full sister to the Alumni bull. Young future donor candidate that has plenty of story and recognition. Sells with a balancer bull calf sired by Basin Payweight 1625. Finding females offered for sale of this quality is a rare treat.
