Bull Sale

Tuesday, March 1, 2016 • 1:00 PM (CST)
At the Ranch, Arapahoe, NE

WARNER BEEF
• GENETICS •

Welcome TO THE SALE!

Welcome Cattlemen,

It is with great pleasure that we invite all of our past customers back and welcome any new customers to the 2016 Warner Beef Genetic Investment production sale. The sale offering for 2016 offers the highest quality bulls assembled for our spring production sale.

This offering brings you large offerings of sire groups that have been well accepted in the industry. The Edison sons continue to fit the industry needs in many ways. Much excitement has been created with the Highly Focused sons for their calving ease, low birth and carcass. The Red Power, Sandhills, Industry 301 sires continue to produce sons that offer balanced traits with muscle and depth of body. We are very excited about our young sires DLW Alumuni and DLW Guardian that have progeny in the sale for the first time that offer calving ease, performance and carcass.

Our ET program has given us the opportunity to maximize the production of our donors Ms Matron 802U, Ms Season 5115R, and Ms Value Added. The values of these females in their sons selling gives a strong production and maternal base with continued production of their predictable genetics.

Again this year all the sale cattle have been DNA tested to provide Genomic Enhanced EPDs. Our intention is to provide you, the buyers, with the most accurate data available. This adds more accuracy and validity to the same EPD profile you are accustomed to. The Genomic Enhanced numbers reflect the values of what the same animal will possess after two or three calf crops. Please ask me any questions that you may have as I'm more than willing to help bring you up to speed where technology has lead the industry today.

The bulls have all been ultrasounded for carcass traits and that data is available. I believe that genomics are the direction of the future and will give us more validity in time. Each and every bull offered has been semen tested and sells as a satisfactory breeder. All registrations are up to date and will be transferred to the new buyers.

We have added the percentile rank of all EPDs in the sale book this year to provide even more updated data to help with the selection of your bulls. Please take a look at this as we strive to produce cattle that will work for all the aspects of the industry.

Every bull is fully guaranteed for the first season. We have complete confidence in every animal in the sale. We value your business and will work in any way necessary to accommodate your needs.

About the Bulls...

View videos online of all sale cattle at www.mms.bz and www.warnerbeef.com

Warner Beef Genetics retains 1/3 semen interest in all bulls sold in this sale.

WARNER BEEF GENETICS BULL BREEDING GUARANTEE

Each bull offered carries a full first season guarantee. This covers all injuries from feet problems, injured penis and death. For any reason that you have a concern about the health of your purchases, please call us here at Warner Beef Genetics. We do ask that if there is a problem with a bull, please notify us before disposal of a bull. This will give us the opportunity to determine the cause of the injury and correct it if possible. All guarantees cannot exceed the purchase price of the bull. We will always do our best to insure that your cows are pregnant with the best bull for you that we have available.

HEALTH

All bulls selling have passed a complete breeding soundness exam, are guaranteed breeders and qualify for the Warner Beef Genetics Bull Breeding Guarantee. Scrotal measurements will be listed on the supplement sheet on sale day.

WINTERING WARNER BULLS

Warner Beef Genetics will feed and care for your bull purchases free of charge until April 1, 2016. A cost of feed charge of \$3.00 per day will apply after April 1.

TRUCKING

Free trucking on any purchase to surrounding states and free nation wide trucking for purchase of 4 or more bulls per ranch.

GENOMIC ENHANCED EPDS

Most bulls have been DNA Tested with Genomic Enhanced EPDs, and are denoted as such in the footnote. Under the EPDs in the sale book is the percentile rank of each EPD in comparison to all Gelbvieh and Balancer cattle in the American Gelbvieh Association registry.

Smart Select Service

How well do you really know your cows? Get to know them better through Smart Select Service. Smart Select Service is an online record management database that gives the commercial producer, regardless of breed, genetic tools generated from their cows' records. For just \$1 per head annually, these tools can then be used to make sound breeding decisions that will identify the cows that will increase herd productivity and profitability.

Genetic Tools:

- Feeder Profit Index (FPI): Index for selecting progeny to perform in the feedyard and on the rail.
- Stayability (ST score): Gauge the reproductive longevity of the herd.

Herd Reports:

- Progeny Report
- Herd Sires Report
- Dam Production Report
- Herd Summary Report

Enrollment is easy and open for all females in the herd, including potential replacement females and mature cows. Simply enter basic information such as animal ID, estimated birth date, and possible sire and dam during initial cow enrollment.

Members of Smart Select Service also gain free access to professional and knowledgeable American Gelbvieh Association staff to aid in development of a management plan best serving the interest of each ranch.

Contact the American Gelbvieh Association at 303-465-2333 for more information and to get started with Smart Select Service today.

Superior red purebred bull here. We took a little step back in time to use a red bull in Gambler that always created widely accepted cattle. The 530C bull offers the softness and correctness that is difficult to find in a lot of purebred cattle out there. Most impressively he scans a 15 inch ribeye and 4.5% IMF! That is a purebred bull for the industry in 2016. Herd bull potential. Look him up.

Homo Polled by birth right. Sand Trap is the lead bull in our National Champion Pen of 3 bulls in Denver. One of the highest quality Balancer bulls to sell anywhere in 2016. Out of a tremendous female that needs no introduction in Matron 802U! Sired by the great Sandhills bull that has proven his worth in the quality of progeny across the nation. This Homo Black herd bull will have heavy use across the country including here at Warner Beef. Don't miss an opportunity to own one of the best Balancer bulls out there. Herd Sire Candidate. Retaining 50% semen interest

In an effort to make as many sisters as we could we flushed the 6718S cow back to 715T. This gives us full brothers to the Futurity champion and AI sire, Edison 6718X. Here is an opportunity to take advantage of. Don't miss these brothers.

I really like this bull! The Industry 301X sons have been in high demand from cattlemen across the country and this bull may be the best to sell yet. Out of a maternal sister to the dam of 2501B bull selling. Cattlemen take notice, great bulls all trace back to great cow families.

It's easy to get excited about this bull! Herd Sire credentials in a package that looks this good and is bred this well definitely pays the bills. His dam is a full sister to futurity champion Alumni. Alumni and his brothers took the breed by storm in 2014 and this stud has the same potential. Sired by one of the most sought after Angus bulls in the country gets you on the leading edge of the industry. Herd Bull Alert!! Don't miss this opportunity.

The American Gelbvieh Association's Feeder Finder service assists producers in marketing load lots of Gelbvieh and Balancer® influenced feeder cattle. Whether selling private treaty or via auction, producers with load lots of feeder cattle are encouraged to fill out the free Feeder Finder form. These cattle are then listed on the AGA website and presented to feedyards across the country. Contact William McIntosh at 502-867-3132 or Angela Vesco at 303-465-2333 to list your cattle on Feeder Finder.
