Bull Sale

Tuesday, March 7, 2017 • 1:00 PM (CST)
At the Ranch, Arapahoe, NE

WARNER BEEF
•GENETICS•

Welcome TO THE SALE!

Welcome Cattlemen and Cattlewomen,

On behalf of the entire Warner family I would like to invite you to the 2017 Genetic Investment Bull Sale. This is the 19th year we have offered Gelbvieh and Balancer bulls at auction and there were several years prior to that of private treaty sales. If there is anything that comes to mind as I recall the years of doing business it is a feeling of gratitude. We sincerely thank all of our customers (past-current and future) for their dedication and loyalty to our program.

I have always tried to maintain a positive view on any and every issue and that stands true today. The current state of the economy and the market in my opinion is that of opportunity. Yes we are not seeing the highs in the market of the recent history but there is still levels of profitability within the next marketing year. Bottom-line is that better cattle are bringing more money and now is the time to invest your dollars aggressively.

Warner Beef Genetics has brought forward a set of bulls with the most information possible to you the customers. Only the top 25% of the bull calves born are being offered this year. We have diligently sorted every calf for quality and disposition. With that being said the offering once again has been screened and sorted by DNA, ultrasound and fertility testing. We have not presorted the cattle that we have genetic tested, you have genetic enhanced epd's on every Gelbvieh and Balancer bull in the offering. This is the most accurate information to date on every bull selling.

Our relationship to our customers does not stop with sale day or bull delivery. We take great pride in the repeat customers that we work with and that can only be attributed to the quality of the bulls and the warranty that stands behind them. Our bull guarantee is very simple- if you aren't satisfied then we will work diligently to accommodate your needs.

The bulls have been handled to meet your needs as a buyer but remain in working condition to insure longevity. I can make the cattle fleshier to suit the eyes on sale day but this only leads to disappointment for both parties in the future. You are buying athletic bulls that will hold up in every environment. You can select your bulls with confidence within this offering.

The sire groups are similar to those of the past-sons of Edison, Red Power, Highly Focused, Pension, Go Daddy, and White Sand with the addition of sons of Wide Tracks, Barrett and Roundhouse. I'm really excited about all three new sires and the genetics that they offer. I truly believe we have one of the strongest Gelbvieh and Balancer bull batteries in the nation to bring the best selection of bulls forward. There is an added number of Angus bulls in the offering. Select these bulls for both their calving ease and the potential to maintain the proper mix of Continental and British genetics within your calf crop.

Feel free to contact us prior to the sale with any questions and we look forward to seeing you on March 7th.

About the Bulls...

View videos online of all sale cattle at www.mms.bz and www.warnerbeef.com

Warner Beef Genetics retains 1/3 semen interest in all bulls sold in this sale.

WARNER BEEF GENETICS BULL BREEDING GUARANTEE

Each bull offered carries a full first season guarantee. This covers all injuries from feet problems, injured penis and death. For any reason that you have a concern about the health of your purchases, please call us here at Warner Beef Genetics. We do ask that if there is a problem with a bull, please notify us before disposal of a bull. This will give us the opportunity to determine the cause of the injury and correct it if possible. All guarantees cannot exceed the purchase price of the bull. We will always do our best to insure that your cows are pregnant with the best bull for you that we have available.

HEALTH

All bulls selling have passed a complete breeding soundness exam, are guaranteed breeders and qualify for the Warner Beef Genetics Bull Breeding Guarantee. Scrotal measurements will be listed on the supplement sheet on sale day.

WINTERING WARNER BULLS

Warner Beef Genetics will feed and care for your bull purchases free of charge until April 1, 2017. A cost of feed charge of \$3.00 per day will apply after April 1.

TRUCKING

Free trucking on any purchase to surrounding states and free nation wide trucking for purchase of 4 or more bulls per ranch.

GENOMIC ENHANCED EPDS

Most bulls have been DNA Tested with Genomic Enhanced EPDs, and are denoted as such in the footnote. Under the EPDs in the sale book is the percentile rank of each EPD in comparison to all Gelbvieh and Balancer cattle in the American Gelbvieh Association registry.

Warner Beef Genetics Wins Big in Inaugural Gelbvieh Carcass Contest

Results of the inaugural American Gelbvieh Foundation (AGF) Steer Challenge and Scale and Rail Sire-Identified Carcass Contest were announced during the 46th Annual American Gelbvieh Association National Convention awards banquet on Friday, December 3. Breeders from Kansas, Nebraska, and Illinois took home top honors with prize payouts totaling \$7,900.

The AGF continues to help advance the Gelbvieh breed through its support of research and development. For this reason, the AGF launched its first ever Steer Challenge and Scale and Rail Sire-Identified Carcass Testing Contest. These two projects together provide the information and funds necessary to generate datasets to advance Gelbvieh and Balancer® carcass merit.

The AGF Steer Challenge was a competition amongst individual Gelbvieh and Balancer-influenced steers in which the judging criteria focused on average daily gain in the feedyard, carcass value and overall top value animal, which combined average daily gain and carcass value. The Steer Challenge gives an opportunity for participants to donate a steer to the AGF. All proceeds from the donation go toward research and development within the Gelbvieh breed. The AGF Sire-Identified Carcass Testing Contest judges steers, which were in a group of three or more animals from the same contemporary group, on these same qualities and also awarded a top-performing pen. In its first year, nine ranches participated with a total of 35 animals on feed at Roode Feedyard in Fairbury, Nebraska. All steers were harvested and values were calculated in July 2016.

Warner Beef Genetics, Arapahoe, Nebraska, owned the steer which took second place for top carcass in the Balancer division with a carcass value of \$1,114, hot carcass weight of 1,055 pounds, and a 12.5 square inch ribeye. This same steer also placed second for top value animal with a total value of \$1,117, USDA Yield Grade 3.8 and quality grade of USDA Choice-. This steer was sired by DCSF Post Rock Highly Focused 308Y8. Warner Beef Genetics also owned the champion pen of Balancer steers with an average top value of \$1,374, average USDA Yield Grade of 3.5, and average quality grade of USDA Choice-. They took home \$1,400 in prize payouts for their steers' performance in the contests.

Profit Tips by Sara Brown: Quality Bull Selection can Increase ROI

Article from Drovers Journal- January 2017 issue

In the process of saving on inputs, some producers might cut back on the money spent for replacement bulls. But using a bull of reduced quality could impact profitability for the next several years due to heavier birth weights, lower weaning weights, lower carcass quality or less desirable replacement heifers. Those who produce calves with desirable genetics and value added traits will have the greatest likelihood of remaining profitable.

How can you justify spending more on a quality bull in difficult economic times? Researchers at The Samuel Roberts Noble Foundation say to consider two scenarios. Scenario one: Use an average quality bull that costs \$2750. Scenario two: Purchase a high quality bull in the top 20% for weaning weight EPD that costs \$3500. Both bulls will remain in the breeding herd for four years and breed 25 cows per year, totaling 100 calves. The annual cost for each bull on a cow basis is \$35.60 and \$43.10 for scenario one and two respectively. The scenario two bull costs \$7.50 per cow more annually compared to the lower quality bull in scenario one.

On the revenue side, calves are weaned in early October. Calves from scenario one wean at 535lb. valued at \$135 per cwt, or \$722 per head. Scenario two calves had heavier weaning weights at 600 lb. valued at \$132 per cwt or \$792 per head- an increase of \$70 per calf from the better bull. Calves from scenario two have a positive net difference of \$62.50 more per calf (\$70 minus \$7.50).

Genetic Investment Purebred Gelbvieh Bulls

An exciting fresh sire that offers a new look to the purebred breeders. An ET son of the Matron 802U donor cow that proves her worth with every calf crop. Many will recognize the dam for her progeny of Alumni, Future Trend, New Frontier, Sand Trap, Jackpot, and more females than I can list. This is the first calf crop by CTR Wide Tracks and we can't be more excited! He offers a cow family that blends notable sires like About Time, Sandman, Double Shot, along with several tremendous females. Density offers a contemporary look in a dynamic genetic package that is sure to please the most difficult breeder.

This PB 94% bull offers the combination of performance and phenotype with history and confidence to the highest degree. Sired by the Highlight 066K bull that needs no introduction in the ability to sire cattle with added carcass but more importantly all the convenience traits that add to feeder calf value and industry acceptance. Maternally, Dedication 7120D marries two top revenue producing females in the Warner Beef program, 408P- dam of DLW Wardon, and 203N- dam of DLW Windsor. It is important to stack cows in the pedigree to insure consistency and this bull maintains several "great ones". Use bulls that look like you want your cows to be, if you want them moderate, big bodied and powerful then Dedication 7120D rises to the top.

If you are in search of a homozygous black and homozygous polled herd sire than you will want to evaluate 581C. His Bismarck dam did an excellent job and he has been a standout since birth. A bull that excels in growth and will leave mouthwatering daughters to retain in your program. Edison sires cattle that are truly the commercial man's kind.

\$mart Select Service

How well do you really know your cows? Get to know them better through Smart Select Service. Smart Select Service is an online record management database that gives the commercial producer, regardless of breed, genetic tools generated from their cows' records. For just \$1 per head annually, these tools can then be used to make sound breeding decisions that will identify the cows that will increase herd productivity and profitability.

Genetic Tools:

- Feeder Profit Index (FPI): Index for selecting progeny to perform in the feedyard and on the rail.
- Stayability (ST score): Gauge the reproductive longevity of the herd.

Herd Reports:

- Progeny Report
- Herd Sires Report
- Dam Production Report
- Herd Summary Report

Enrollment is easy and open for all females in the herd, including potential replacement females and mature cows. Simply enter basic information such as animal ID, estimated birth date, and possible sire and dam during initial cow enrollment.

Members of Smart Select Service also gain free access to professional and knowledgeable American Gelbvieh Association staff to aid in development of a management plan best serving the interest of each ranch.

Contact the American Gelbvieh Association at 303-465-2333 for more information and to get started with Smart Select Service today.

FEEDER Finder

The source to find Gelbvieh and Balancer® influenced feeder cattle

The American Gelbvieh Association's Feeder Finder service assists producers in marketing load lots of Gelbvieh and Balancer® influenced feeder cattle. Whether selling private treaty or via auction, producers with load lots of feeder cattle are encouraged to fill out the free Feeder Finder form. These cattle are then listed on the AGA website and presented to feedyards across the country. Contact William McIntosh at 502-867-3132 to list your cattle on Feeder Finder.

Double Black, Homozygous Polled. Tremendous beef bull that offers more depth of body and base width in an eye appealing package. Out of a tremendous cow family and a past national champion female with added growth potential. Sire of several top bulls in this sale along with the high selling open heifer in the fall female sale. This is a sire of cattle that get better every day...., we can't wait to see what is yet to come.

Owned with Cedar Top Ranch, Sienknecht Cattle Co, and Eagle Pass Ranch.

Homozygous Black, Homozygous Polled. Our purebred sire that offers as much pedigree legacy as any in the breed. A son of our Traction herdsire from Canada with the added touch of the great 198L female in the Cedar Top program. We believe in stacking cow families and this bull offers some of the best. Siring moderate framed, maternally oriented progeny with all the important convenience traits of trusted ranchers. A bull every cowman should use to make replacements.

Owned with Cedar Top Ranch.

Semen available from owners and Bull Barn Genetics.

Double Black, Homozygous Polled. One of the most exciting sires to sell in 2016. Warner Beef selected this young sire in Denver 2016 for his overall balance and power in a high performance, high carcass package. Furthermore the bull offers tremendous correctness and phenotypic quality stemming from possibly the most famous Gelbvieh female to date, "Promises". His first calves are hitting the ground and are little, square, and cool! We are truly excited about the opportunities in this great sire.
