

LARSON'S
LOST
RIVER
LIVESTOCK

Gelbvieh - Balancer - Red Angus

8TH ANNUAL
PRODUCTION SALE

SUNDAY, FEBRUARY 18, 2018
2:00 PM (CT) at the ranch, Clearbrook, Minnesota

Welcome to our 8th annual production sale. As always, to our past customers, thank you, to those of you looking for the first time we sincerely believe you will find something in these pages that fits your program goals. We are excited to again have guest consignor Dahlke Red Angus bringing Red Angus bred heifers. All bulls in the sale were bred and raised by Lost River Livestock. Again this year, we have retained the services of Mitchell Marketing Service to help organize our sale for a better buyer experience and to market our cattle. Please don't hesitate to contact Chris for an honest opinion of any lot in the sale or for more information.

Last year, this letter strove to describe our bull and heifer development system, which are best defined by the word Extensive. This year I want to describe our seedstock selection program. It should be understood that not every male calf deserves to be a breeding bull. We hold high standards for the bulls we select to market. This includes many traits such as genetics, birth weight/calving ease, disposition, structural soundness, performance, fertility (BSE performed before the sale), and carcass merit. This year, less than half of all male calves born were kept as bulls to be offered for sale. We strive to present only the best to our customers, and by doing so hope our bulls can improve their offspring, in turn generating more revenue. Post-weaning performance of the bull and steer groups backs up our selection process. Both groups were fed essentially the same ration, the bull calf average daily gain after weaning was 3.47 lb/day and steers were 2.86 lb/day. Obviously, the bulls have the advantage of being intact males and receiving more TLC, but they are definitely the very top end of our genetics. Buy with the confidence that we have done the work to select only the best from the heart of our herd.

These bulls are also backed up by a strong set of cows, selected for many of the same traits. The American Gelbvieh Association annually recognizes cows that excel in production and reproduction. We were excited to be listed as number 11 out of 20 in the national ranking of top owners of Dams of Merit/Distinction. In order to qualify as a Dam of Merit, a cow must wean at least three calves all with a weaning weight ratio of at least 101 and do that while staying in a 365-day calving window, never falling behind. To become a Dam of Distinction, a cow has the same requirements, however she must have produced at least 8 calves. We currently have 30 Dams of Merit and 1 Dam of Distinction. This is clear evidence that our heifer selection program is working as well and will pay dividends in our bull crop going forward.

Once again, we are fortunate to have Jay Elfeldt call our auction, along with three excellent ringmen. Our auction, for those of you who have not been with us, is a 100% video sale taking place inside of our heated, 100-year-old sale barn, with the cattle penned outside. Our auction will also be broadcast on DV Auction for those of you who cannot join us in person. We love to talk cattle, so please call us with any questions, or if you would like to see the cattle please stop by. New this year, we will have an open house to view the sale cattle during the afternoon of Saturday, February 17, refreshments provided.

Finally, we sincerely appreciate your interest in our cattle and your support of our sale. Please join us Sunday, February 18 at 2:00 pm for our year's most enjoyable day of "work." We look forward to seeing you at the sale!

Sincerely,
The Larsons

8TH ANNUAL PRODUCTION SALE

SUNDAY, FEBRUARY 18, 2018
2:00 PM (CT) at the ranch, Clearbrook, Minnesota

Please join us February 17, 2:00 pm, for our Open House and to view the Sale Offering.

DIRECTIONS TO THE SALE LOCATION

3 miles south of Clearbrook on Hwy. 92 and 5 miles west on Hwy. 18 or 10 miles east of Fosston on Hwy. 1, 4 miles north on Hwy. 7 and 3/4 east on Hwy. 18

SALE FORMAT

The auction will be held in a heated building, with video monitors set up and each animal's video played while the animal sell. There will be no live lots in the building. All lots will be penned outside for viewing prior to the sale.

VIEWING OF CATTLE

Cattle will be penned and available for viewing Saturday afternoon starting at 1:00 PM, and on sale morning starting at 9:00 AM.

VIDEOS AND SUPPLEMENTAL DATA

Videos will be posted online at www.lostriverlivestockmn.com and www.mms.bz, or mailed upon request. Current weights and measurements will be available sale day.

ONLINE VIEWING AND BIDDING

The sale will be broadcast live online with DV Auction. www.dvauction.com See page 2 for more information.

LIVESTOCK PRESS REPRESENTATIVES

Alex Acheson, Minnesota Farm Guide	785-366-1185
Luke Keller, Progressive Genetic Solutions	701-471-1142
Greg Froslee, Special Assignment	218-639-1626
Angela Vesco, American Gelbvieh Association	775-421-9894

COMPLIMENTARY LUNCH

Complimentary lunch served at 12:00 noon.

LODGING

Piper's Inn, Clearbrook, MN 218-776-2323

HEALTH

Bulls have received all common calfhood vaccinations and been poured with Ivermectin. Bred heifers have been vaccinated with Scourguard 4KC and poured with Ivermectin. Please ask us for a complete herd health protocol.

INSURANCE

We strongly encourage all buyers to insure their purchases. Mortality insurance can be purchased through Lindfors Insurance Agency. 218-435-6585

TERMS AND CONDITIONS

Each animal will be sold to the highest bidder. The auctioneer will settle any bid disputes. Animals must be settled for on sale day with cash or check. All animals are the purchaser's risk as soon as sold. Anyone attending the sale does so at their own risk. Lost River Livestock, sale consignors, sale management, and/or any of the sale crew will not be held responsible for any accidents, damages or stolen items. Lost River Livestock will retain a 50% semen interest in all bulls sold.

ANNOUNCEMENTS

Any necessary corrections to the sale catalog will be made sale day. Announcements made sale day and from the auction block take precedence over any printed material in the catalog or otherwise associated with the sale.

SALE MANAGEMENT BY: Mitchell Marketing Service

Chris Mitchell 334-695-1371
20180 NE Roy Golden Road
Blountstown, FL 32424

Larson's Lost River Livestock Discounts

5% Discount on the Purchase of 4 or more bulls.

\$50 Discount on all bulls hauled home within five days of the sale.

DELIVERY

Free delivery within 100 miles of the farm. Consignors will work with buyers to split costs if delivery is over 100 miles.

BOARDING

Bulls not picked up before March 1, 2018 will be boarded and fed until May 1, 2018 at a cost of \$2.50 per day. Bulls left until March will be semen checked again before leaving the farm. Successful buyers are responsible for their animals purchased sale day. We recommend insuring your purchases.

BREEDING GUARANTEE

All bulls are sold as guaranteed breeders and heifers sold as bred. In the event of unsatisfactory breeding performance, either a replacement bull or heifer, or a refund of purchase price or a credit will be provided, when defective bull or heifer is returned to the seller in good health. All females sold as "safe in calf" will be examined and declared safe by a licensed veterinarian within 3 weeks of the sale date.

LARSON'S LOST RIVER LIVESTOCK BULL

SELECTION

The bulls we sell in our annual production sale are selected from the top 50% of our calf crop each year. All bulls must meet our quality, performance, birth weight and testicular growth criteria.

TRANSFER OF REGISTRATION PAPERS

Registration papers will be transferred to the buyer on all registered animals.

BULL PREPARATION, FEED PROGRAM AND AVERAGE DAILY GAIN

The Average Daily Gain (ADG) on each bull is denoted in the sale book with each lot selling. The bulls were placed on a ration 2 weeks after weaning designed to achieve 3.1 lb/day ADG. The gain test was performed in a 60 day window between 60 and 120 days after weaning. The bulls exceeded their performance goals by nearly 0.40 lb/day.

CALVING EASE STARS

Calving ease stars are listed for all bulls in the sale book. The recommended calving ease for each bull in the sale is based on the recommendations below.

- **1 star:** for use on cows with little to no calving difficulties under standard conditions.
- **2 stars:** for use on cows with little to no calving difficulties under standard conditions.
- **3 stars:** for use on young cows and mature cows with little to no calving difficulties under standard conditions.
- **4 stars:** for use on growthy heifers with little to no calving difficulties under standard conditions.
- **5 stars:** for use on heifers with little to no calving difficulties under standard conditions.

Crossbreeding is smart and easy with Gelbvieh and Balancer®

Crossbreeding has been utilized in the cattle industry for many years and for good reason. Crossbreeding provides several benefits including those seen from individual heterosis, maternal heterosis and overall greater lifetime profitability. Using Gelbvieh and Balancer® genetics in a crossbreeding program adds productivity, longevity and profitability with crossbred cows and hybrid bulls.

Individual Heterosis

Individual heterosis is the improvement in performance by the individual crossbred animal above the average of its parents. Increased calf livability, weaning weight, yearling weight and carcass traits are examples of individual heterosis in crossbred calves.

Maternal Heterosis

Maternal heterosis leads to the combined improvement in traits from the dam that cause increases in the performance of her and of her progeny. Examples of maternal heterosis in a beef cow include: younger age at puberty, increased calving rate, increased survival of her calf to weaning; longevity and pounds of calf

Trait	Effects of Individual Heterosis on Crossbred Calves	Effects of Maternal Heterosis with Crossbred Cows
Calving Rate	+3.2%	+3.5%
Survival to Weaning	+1.4%	+0.8%
Birth Weight	+1.7 lbs.	+1.6 lbs.
Weaning Weight	+16.3 lbs.	+18.0 lbs.
Yearling Weight	+29.1 lbs.	-
Average Daily Gain	+0.08 lb./day	-
Longevity	-	+1.36 years
Lifetime Productivity of Crossbred Cows = +0.97 Number of Calves and +600 lbs. Cumulative Weaning Weight		

Utilizing Gelbvieh and Balancer Genetics in a Crossbreeding Program

Gelbvieh and Balancer cattle excel in traits such as growth, stayability, and productivity. Using Gelbvieh and Balancer genetics in a crossbreeding program can help increase profitability of an operation. See additional pounds and added profit through more efficiency and greater longevity of cows as well as heavier, faster gaining feeder cattle.

Commercial Red Angus ranches and feedyards continue to demonstrate their ability to combine superior genetics with precise marketing to produce Grid Master Award winners. Only the most genetically capable carcass cattle have the ability to produce the quality end product in a high-yielding package.

Cattle enrolled in the Red Angus Feeder Calf Certification Program (FCCP) and Allied Access program will now have the opportunity to aim for even more stringent standards in order to be labeled "Grid Master." Cattle that reach these prestigious goals will no doubt set the standard for carcass premiums on value-added marketing grids.

"Conventional Fed" Grid Master Specs

- Minimum of 30 head lot size

"Natural Fed" Grid Master Specs

- Minimum of 30 head lot size

LARSON'S LOST RIVER LIVESTOCK GELBVIEH BULLS

LRSF LRL STARTUP E110 ET Sells as Lot 1.

Lot 1

Startup E110 ET leads off our offering of bulls this year and he's one special calf. This purebred Gelbvieh bull is a performance leader with both his WW and YW EPD's ranking in the top 1% of the breed. And he is able to offer these outstanding performance traits while ranking right at breed average for CED. Startup E110 ET has also been gaining weight at a terrific pace, even through the cold weather we've been having. He has gained nearly 4.3 pounds per day over the last 2 months, while the average daily gain of the entire pen has been 3.45 pounds.

Lot 2

Expansion E105 ET is built very similarly to his full brother, lot 1, with an added benefit. He's not only homozygous polled, he's also homozygous black. The depth of body and overall power this bull has is truly impressive. And it's not just his phenotype that's impressive, his EPD structure is incredibly strong. He ranks above breed average for BW and has explosive growth traits ranking in the top 1%. Talk about a curve bender. He also sports some of the best maternal traits you'll find in the breed, all ranking in the top 10%.

LRSF LRL EXPANSION E105 ET Sells as Lot 2.

LARSON'S LOST RIVER LIVESTOCK GELBVIEH BULLS

Lot 3

If you're looking to add some performance to your next calf crop, look no further than Throttle E95 ET; he's an absolute powerhouse. He has a little extra frame size than this ET siblings but doesn't give up any depth or dimension. And since he's purebred Gelbvieh, he's a bull that's really going to produce dividends when put on a group of high percentage Angus females. Can you imagine the amount of hybrid vigor those calves will have? You can put them up against any calves in your country and they'll be tough to beat.

CCRO CAROLINA LEVERAGE 3214A Sire of Lots 1-4.

The first four lots of this sale are full ET brothers and we could not be more excited about them. Their sensational sire, the \$102,000 valuation Carolina Leverage, has been used across the country and his progeny have been praised by both seedstock producers and commercial cattlemen. The dam of these bulls is our terrific Arianna 77B donor, who we purchased from Gustin's Diamond D Gelbvieh in ND as the pick of their open heifers in 2014. She has been everything we could have hope for and more.

Lot 4

Progression E121 ET is the last of the full ET brothers out of the great Arianna 77B donor and has a lot going for him. His BW EPD ranks in the top 40%, and just like his brothers, his growth traits rank in the top 1%. He'll absolutely add some serious performance to a group of calves. And if his calves turn out like him, they'll definitely be able to pack on the pounds post-weaning. Check out his incredible average daily gain of 4.63 pounds.

LARSON'S LOST RIVER LIVESTOCK GELBVIEH BULLS

LRSF LRL VANTAGE POINT E48 Sells as Lot 5.

Lot 5

Everyone is looking to find a way to top their competition and here's just the bull to give you that coveted "Vantage Point" above your competitors. Vantage Point E48 is an all-around kind of calf; purebred Gelbvieh, outstanding EPD strength, tremendous phenotype and backed by one of our very best young cows. And don't forget about his sensational performance data with a 93 BW ratio and a 119 WW ratio. Talk about coming out small and then exploding to weaning. Vantage Point E48 is one of those special calves that can greatly benefit an operation so don't miss your opportunity here to gain a leg up on your competition.

Lot 6

Ascend E89 has been an eye catcher since early on and has continued to get better every day. This heterozygous black and homozygous polled purebred Gelbvieh calf is special in so many ways. His phenotype is one to behold; smooth shouldered, deep ribbed, excellent muscle shape and he's as free moving and loose structured as any bull in the pen. His EPD's are just as impressive with top 20% BW, top 20% growth, top 10% maternal traits and top 15% FPI. And his terrific dam is a top-notch producer being honored as a Dam of Merit 3 years running. Also, he can really pack the pounds on with an ADG of 4.68 pounds. Ascend E89 is a no-holes calf and will be sale day favorite.

LRSF LRL ASCEND E89 Sells as Lot 6.

LARSON'S LOST RIVER LIVESTOCK GELBVIEH AND BALANCER® BULLS

LRSF LRL AXLE E104 Sells as Lot 9.

Lot 9

As you can see from his picture, Axle E104 is a very well made individual. And it would be no surprise if you could see his dam; very clean fronted, explosive through her middle and a ton of muscle shape. You might think she's just a pretty face, but she has a terrific production record. This is her fourth bull calf to make the sale with her first three going to Wes Simenson of Littlefork in 2013, Wayne Koch of Blackduck in 2014 and John Ungerecht of Northhome in 2016. With this cow backing up this bull, Axle E104 is a bull you can be confident in.

Every year there's a bull that takes home the crown of heaviest adjusted weaning weight in the pen and this year, Momentum E116 is that calf. His adjusted weaning weight of 862 pounds was good enough to deliver a ratio of 121. Talk about power. And it's easy to see where he gets his power and quality from. His dam has been an outstanding cow for us, producing two bulls who sold through previous production sales, two females who are now working in our herd, and lot 62 in this sale.

Anchor E29 is purebred Gelbvieh calf that traces back to the great Pancake Y153 donor. This guy's dam is full sister to lots 56-58 in this sale and they are all high quality, functional females that are going to make excellent mama cows. Anchor E29's dam is great young cow with a near perfect udder and did a tremendous job her first time out raising a calf with an adjusted weaning weight of 751. Don't miss this guy if you're looking to produce top notch replacement females.

If you ask anyone around here, Torque E6 has been a favorite since he was born. He's always possessed a presence that grabs your attention and doesn't let go. He is so stout and correctly designed that he'll be desired by any cattleman. He's also homozygous polled and black by pedigree so you can be assured he won't throw horns or red calves. And make sure you take a look at his robust EPD's with 14 different traits ranking in the top 30%.

Crowbar E109 is a very complete Carolina Leverage son and his highly functional dam is a maternal sister to lots 7 and 62 in this sale. Look towards those lots to see the strength of this cow family. Crowbar E109 is also proof of the strength of the Melody cow family. Take a look at his performance statistics: a BW ratio of 92, an adjusted weaning weight of 790 and a WW ratio of 111. That a serious birth to weaning spread.

Engineer E38 is a homozygous black, high percentage Gelbvieh calf with a ton of growth potential. Check out his top 5% WW EPD and top 10% YW. He also is a great individual performer, coming out easy at 84 pounds and weaning off at 751 with a ratio of 105. Engineer also has a terrific pedigree: sired by the ever-popular Carolina Leverage and then on his dam's side, tracing back to the prolific Rylee U810 donor.

Lifter E52 is another powerful Carolina Leverage son with an impressive individual WW ratio of 115. He nursed an outstanding first calf heifer this summer who did a bang-up job. She only weighed 1105 pounds at weaning and this guy weighed in at 740. She weaned off 67% of her body weight, as a first calf heifer! That is some off the charts efficiency and super cow power. Look to Lifter E52's calves to be heavy at weaning and his females to make excellent cows.

The first thing you'll notice about this homozygous black Leverage son when you see him is the tremendous depth of rib and capacity he has. Superior E83 is an absolute belly dragger and that's the type of calves he's going to sire. The next thing about Superior E83 is he was raised by one of our very best young cows, 319A. She has had three bulls in her career, the first being Highly Focused 503C, the sire to lots 22 and 41. Her second calf was a high seller in last year's sale going to Lonny and Wade Burrack of Trail. And with this year's calf, Superior E83, she is building quite the resume.

Pump Action E204 is a high percentage Gelbvieh calf that is homozygous black with high octane growth. Starting off at a modest 88 pounds, he exploded to an impressive adjusted weaning weight of 816 pounds, generating a WW ratio of 114. His growth EPD's are also outstanding, with a WW EPD ranking in the top 1% of the breed! His calves will definitely weigh up at weaning. Pump Action E204's young dam is favorite of ours and her bull calf last year sold to Sheryl Riggs of Shevlin.

Genomic enhanced EPDs. No matter the angle you view this calf from, we think you'll be impressed. Upper Hand E125 ET is one of the most powerful and deep sided calves we have ever raised. He also is super square hipped, heavy muscled and carries that muscle way down in his rear quarter. And to top it off, his disposition is second to none in the pen. His incredibly productive donor dam, Rylee U810, was honored as a Dam of Distinction in 2016 and 2017. She is the epitome of production and style, and if you bring this guy home, you can infuse some of that maternal strength into your herd.

Genomic enhanced EPDs. Investor E107 ET is the second of the full ET siblings on this year's sale out of our prolific Rylee U810 donor. She has been one of the best cows to ever step foot on the place and has been a favorite of everyone who has seen her. Her phenotype is nearly perfect with great femininity, a ton of middle, great muscle expression and a very sound udder. Every bull we have mated her to has yielded excellent calves and the cross between her and Carolina Leverage may be the best mating yet. Investor E107 is super long bodied, has great depth of rib, and is heavily muscled. He'll definitely catch your eye.

Genomic enhanced EPDs. Vintage E84 will make some friends sale day. Based on phenotype alone, he stands right at the top of the bull pen; he's clean fronted and smooth shouldered, deep bodied, square hipped, wide from end to end, gets out and moves with ease, homozygous black and homozygous polled, and very docile. His EPD's are also robust: 12 traits ranking in the top 30% of the breed. And he was raised by undoubtedly one of our best cows. She raised our high selling open heifer in 2015 going to Eagle Pass Ranch in SD and was honored as a Dam of Merit in 2017. An all-around cow behind an all-around bull, Vintage E84 is a bull that needs to be on you list.

Here is the first black son out of junior herdsire, DLW Highly Focused 503C. We are very excited to see what this sire can do for us and Concentration E187 contributes a lot to that excitement. This homozygous black calf out a first calf heifer has so many good things going. As you can see from his picture, he is striking from the side view and when you get behind him, you'll be even more impressed. He is as square hipped as you can make one and is very deep in his flank. And with all of this body and mass, he really weighs up. Check out his robust WW ratio of 111.

Washington E133 is the first son of the great Blackhawk 10B sire in this year's sale and we could not be more satisfied with this sire's progeny. They are performance oriented cattle that don't sacrifice calving ease and are very sound in their design. Washington E133 is built just like that. He is a very loose structured calf and is incredibly sound on the move. He is also a growth powerhouse with a WW ratio of 112 and growth EPD's ranking in the top 15% of the breed. He also sports a CED EPD ranking in the top 25% of the breed making him a very intriguing curve bender.

MacArthur E136 is a homozygous black bull out of Blackhawk 10B and backed by the Blackstar cow family that has proven themselves to be strong producers for many generations. He is very similar to the lot 27 bull and if purchased together, they could sire a very consistent and uniform group of calves with great performance.

Like lot 26 before him, Mattis E140 is sired by Blackhawk and backed by the Blackstar cow family. His dam has been very consistent producer with two daughters working in our herd and three sons that have made our production sales. Mattis E140's full brother sold last year to Klac Thompson of Bagley. This guy also has very solid performance numbers with a WW ratio of 106 and growth EPD's ranking in the top 4% of the breed.

Genomic enhanced EPDs. Patton E141 is one the most balanced and complete Blackhawk sons to be born to date, and one of the best calves in this year's set of bulls. As a first calf heifer, his exceptional young dam produced a beautiful female we consigned to the 2018 ND Golden Rule and then she came back with this stud on her second try. His BW ratio of 95 and WW ratio of 112 are truly impressive. And don't miss his EPD strength: 13 traits that rank at or above breed average. He also possesses an outstanding phenotype with great depth of body, excellent feet and legs and is as square hipped as you can make one. Patton E141 is a calf that can work in any breeding program and produce calves that will be the envy of your neighbors.

Here's another terrific homozygous black son of our senior herdsire Blackhawk 10B. Ulysses E151 is not only sired by one of the best bulls we have ever owned, he is fortunate enough to be backed by one of the best cows we have ever owned. His maternal granddam is none other than our "do everything" cow, Rylee U810. Her stunning phenotype, perfect disposition and incredible production record are what make her such a valuable piece of our herd. Look to Ulysses E151 to not only add performance and style to your calf crop, but also a huge boost of maternal strength.

If you've been hunting for a homozygous black Balancer bull to add some power, performance, and length of body to your calf crop, we think Eisenhower E164 may just be the bull you've been looking for. He certainly packs a punch. Check out his impressive adjusted weaning weight of 830 pounds, earning him a ratio of 116 and he did not slow down from there. He has been one of the best at packing on the pounds in the pen with a strong average daily gain of 4.1 pounds. He will definitely sire a high-performance group of calves.

Pershing E199 is a calf that will catch your eye right away in the pen. Just like his brothers, this Blackhawk son is deep, wide, long bodied, made right and has a great disposition. And just like his brothers, Pershing E199 is very performance orientated with a WW ratio of 108 and a WW EPD that ranks in the top 4% of the breed. He also looks to be very fertile with great scrotal development. This calf is all-around good and will garner some attention on sale day.

Calves with width and depth are always going to weigh up. And if you stretch that body type out a little, you're really going to have some whoppers. Those are exactly the type of calves you're going to get with Sherman E178. He is as long bodied as any calf in the pen with great depth of body and width. When you get behind him, he is super square and carries his muscle deep into his quarter. He gets many of his great qualities from his outstanding sire and many more from his dam. She is very functional purebred Gelbvieh cow with a great udder and near perfect feet. She's a cow that would fit nicely into any herd.

NASDAQ E9 is our lead off Profitbuilder son in this year's catalog and the Profitbuilder calves are some of the best we have ever raised. They are so consistently good, you're going to have a tough time taking just one home. NASDAQ E9 is super long spined, very deep bodied and incredibly thick from behind. This ¾ Red Angus calf gets better every day and will not only impress you physically, but also on paper. His BW EPD ranks in the top 20% of the breed and his WW and YW rank in the top 24% and 34% respectively. Curve bending genetics in an attractive package, what more could you want.

Hedge Fund E47 is undoubtedly one of the most impressive bulls in the pen this year and it's no surprise when you see who his sire is. This Profitbuilder son may be one the most complete and powerful Red Angus/Gelbvieh cross bulls we have ever raised. From his adjusted weaning weight of 829 and WW ratio of 115, to his robust EPD structure, to his ease of movement, Hedge Fund E47 is very special. When you study his phenotype, he does almost everything right. He's tight fronted, smooth shouldered, massive and deep through his middle and possesses abundant muscle and width from behind. He'll undoubtedly make some friends sale day and whoever brings him home will take home an extraordinary breeding piece.

Paramount E22 an eye appealing bull sired by the tried and true legend, JRI Prime Cut. There's a reason Prime Cut has been used for so long: his calves are flat good. They are easy fleshing, built right from the ground up, have excellent scrotal circumference, and the females make terrific mama cows. If you're looking for proven genetics that work in all environments, look no further than Paramount E22.

Here is our only red purebred Gelbvieh calf this year and he is a good one. Elite E40 is sired by the maternal and calving ease legend, JRI Prime Cut and was raised by an attractive first calf heifer who comes from the excellent line of Snazzy females. The cross between Prime Cut and the Snazzy cows has worked for us very well over the years and here's your opportunity to infuse those genetics into your herd. Make sure you keep this guy's daughters as they will make terrific cows.

Lochte E111 ET is the first of three full ET brothers out of the great Bieber Deep End sire and one of our very best purebred Red Angus cows, Lakota W1. She is a direct daughter of the maternal legend, Seeger Lakota 9708, the matriarch of our Red Angus herd. Couple that maternal strength with the growth and carcass traits Bieber Deep End features, you end up with a set of balanced calves with great performance.

Pacific E115 ET has a little extra frame size than his brothers but he really packs the pounds into that frame. His 763-pound weaning weight is impressive but even more impressive, he sports the best average daily gains in the pen, gaining a remarkable 4.88 pounds per day over a two-month period defined by many days of below zero temperatures! If he can do that, think of what his calves can do for you.

Artic E88 ET is a long bodied, free moving Bieber Deep End son with great feet and legs. He is also incredibly square when you get behind him and has great muscle development. He comes from a flush of our great Lakota W1 cow, who has a picture-perfect udder and outstanding foot structure. Look to keep to the daughters out of this bull because they will make excellent cows with bred in longevity.

LAKOTA W1 Dam of Lots 44-46.

Free Feeder Cattle Marketing Service...

Use Red Angus Feeder Fax to send descriptions of your feeder cattle and calves to feedyard managers and order buyers, who have expressed an interest in feeding Red Angus. Feeder Fax is FREE, and works for load lots of calves or yearlings. Whether you are selling through a sale barn, video auction or private treaty, Feeder Fax is available to help inform buyers of cattle you have for sale. Listing your cattle on the Feeder Fax is easy:

- Send a description of your cattle to feederfax@redangus.org
- Or, call Red Angus Marketing Programs at 940-387-3502 ext. 2.

Whenever you hear the market report and a commodity you deal in is "Limit Up," it's a good day. And if you're looking for more of those good days, you need to pay some serious attention to this guy. Limit Up E64 is absolutely one of the most complete and impressive calves we have ever raised. Based on phenotype alone, he has been praised by everyone who has seen him. He is so deep ribbed and massive from behind, it's almost crazy how extended and smooth he is through his front one-third. And with top 1% growth traits, a top 1% Gridmaster index and a top 18% Herdbuilder index, this guy will produce some of your heaviest, most eye appealing, carcass orientated calves, all with terrific maternal strength. When you come to the sale on February 18, make sure you find this guy. We think you'll become friends.

It's been said before and it's going to be said again; the Profitbuilder calves are some of the most complete calves we have ever raised. Calving ease, performance, carcass traits, eye appeal, disposition, scrotal development; they are the real deal and Blue Chip E99 is certainly another one of those special calves. This 4-star calving ease prospect also excels in growth with an adjusted weaning weight of 832, the highest of our Red Angus calves. He's a bull that's going to sire calves with high profit margins and in the end, that's what everyone is looking for. He will definitely need your attention on sale day.

Dividend E86 is another high-quality Profitbuilder son with slightly more frame size compared to some of half-brothers. However, he enjoys many of the same excellent traits as his brothers. He's wide topped, easy fleshing, and very sound on the move. He also was raised by one of our top-end Red Angus cows. She produced the bred heifer we sold on the 2017 ND Red Select Sale to Weisbeck Red Angus of SD.

Wizard E152 is the first son we are offering for sale out of our 3SCC Merlin sire. This moderate framed, high calving ease calf qualifies as 5-star calving ease prospect with a CED EPD ranking in the top 23% of the breed and a BW EPD ranking in the top 37%. He is also built like a high calving ease bull should be. He is small headed, tight fronted and smooth shouldered. However, even with his high marks for calving ease, he still performs well with an adjusted weaning weight of nearly 700 pounds.

Arthur E197 is another son of the 3SCC Merlin bull and is very deep bodied with great thickness and an excellent haircoat. His dam has been a solid producer for us and raised lot 75 in this sale, a very attractive and deep bodied purebred Red Angus bred heifer. Deep bodies with great muscle development and wide tops seem to run in this family so don't miss your opportunity to add these predictable genetics to your herd.

LOST RIVER STEERS TOPPED THE SALE.

LAZY TV Watchman has been one of the Gelbvieh breed's most heavily used sires for the past few years and for good reason. Just take a look at this girl. Ma Belle D44 is very tight fronted, smooth shouldered, super wide topped and travels on a great set of feet and legs. Due March 1, 2018 with a calf sired by DLW Highly Focused 503C.

Empress D236 is a very feminine female with good depth of body and is very sound on the move. She also possesses great performance numbers with her WW EPD ranking in the top 10% and her YW EPD ranking in the top 15%. And couple that performance with the calving ease her service sire brings to the table, her first calf will be a very solid individual. She calved January 23, 2018 with a bull calf weighing 75 pounds sired by LEACHMAN LA Certainty G066A. Lot 60a: F75

Melody D76 is one of the most powerful and attractive females we have ever offered up for sale. She is so heavily muscled and deep bodied, you could breed her to almost anything and get a calf that's going to have some serious oomph. And while she is very robust in her design, she still maintains great femininity. She is also a maternal sister to lot 7 in this sale, a bull with an 862-pound adjusted weaning weight with a ratio of 121. There's definitely performance and power bred into this chick. She's due March 21, 2018 with a calf sired by DLW Highly Focused 503C.

Rochelle D141 is a very functional and attractive Blackhawk 10B daughter out of a very productive cow from Randy Sienknecht. We purchased this heifer's dam as a bred heifer on the Gelbvieh Gold sale in Iowa and she did not disappoint. Her first calf went on to raise a high selling bull on our sale in 2015 and her second calf was the high selling open heifer on the Golden Rule sale in North Dakota in that same year. Rochelle D141 is backed by some powerful genetics and should go on to be a great cow. She's due April 29, 2018 with a calf sired by DLW Highly Focused 503C.

Kenzie D24 is definitely one the most attractive heifers in the pen. She is very clean fronted, super deep bodied, and has great muscle shape. And it's no wonder she's so pretty and balanced, her sire Redemption has been siring calves like her all around the country since his first ones hit the ground. She's not just a pretty face though, she possesses an excellent set of EPD's with 10 traits ranking above breed average. She calved January 18, 2018 with a beautiful heifer calf weighing 77 pounds sired by VGW Direct Drive 512. Lot 64a: F33

Penny D218 is backed by a great female producing mama cow. This girls dam produced our high selling bred heifer in 2016 going to Prairie Hills Genetics of ND and an open heifer that sold on the ND Red Select sale going to Dahlke Red Angus. Penny D218 does not only score high for maternal traits, she is very strong phenotypically. She's due February 15, 2018 carrying a purebred Red Angus heifer calf sired by H2R Profitbuilder B403 and not only are his bull calves great, his females are too.

Ms TJ 6D is a long bodied, feminine made female sired by the cow maker, Feddes Big Sky. Her dam is a fertile cow with a perfect udder sired by Basin hobo 79E, which was known for his high producing daughters. There is a chance she could have her Andras Fusion sired calf at side by sale day. A.I bred 5-23-17 to Andras Fusion due 3-1-18. Pasture exposed to Dahlke Endeavor 9D 5-28-17 to 8-4-17.

DAHLKE MS.TJ 6D Sells as Lot 83.
