WWW.CRANVIEWGELBVIEH.COM

Welcome Beef Producers,

Welcome to our 16th Annual “Genetic Progress” production sale! It’s always a pleasure to invite both new and repeat customers. Every year it seems like our bulls outpace the previous year’s bulls, and this year is no different. In fact, I would say that this is the most uniform set of bulls we have offered.

Our goal is to produce cattle that will keep our customers profitable...even in the tough years! So, to us, that means...1) you need a live calf, 2) those calves must excel at growth, 3) they need to be efficient in the feedlot, and 4) the carcasses need to be >80% choice. If your cattle can do this, you will always be profitable!

To accomplish these goals, our offering comes from natural service sires, Artificial Insemination or Embryo Transplant. Our ET program continues to use our best cows and mate them to the bulls that compliment them best. Embryo transplant has allowed us to make genetic progress in our herd faster than any other process. Now that we have employed this practice for 20+ years, we have found that our heifers are outpacing our aged cows. Just look at the first two ET calves out of D642 in this sale.

As we have done in the past, all the sale cattle have been DNA tested for sire verification and to provide Genomic Enhanced EPDs. The Genomic Enhanced EPDs reflect a much stronger accuracy than the same EPD profile you are accustomed to using. So, in other words, it would take you two to three calf crops to get to the same information as we have been able to give you with the Genomic Enhanced EPDs...they are a much better indicator of future performance than we previously had without them. This is the reason that flush mates will differ in their EPDs. We sincerely hope you find value in us doing this.

We try to do everything possible to make these cattle work in these environments. We pay strict attention to all the convenience traits that make the business easier for all of us; including disposition, feet, structural soundness, and udder quality. I am especially proud of the fact that we have never had a foot complaint with our cattle...I think it speaks to the fact that our cattle are fed on a high roughage ration rather than grain. These cattle have gone into different environments throughout the US to include Kentucky, Texas, Colorado and several Canadian provinces to perform very effectively.

In the event something does happen, we guarantee these animals through their first breeding season. If you have confidence in our program, we will stand behind your purchases.

Thanks again for your confidence in our program. We hope to see you at our sale!
Contact us if you have any questions. We appreciate your support!

Sincerely,

Rob & Bill Arnold

GENETIC PROGRESS BULLS AND FEMALES

**CRANVIEW GELBVIEH IS RETAINING 50% SEMEN INTEREST IN ALL BULLS SELLING.
BUYER GETS FULL POSSESSION AND 50% SEMEN INTEREST WITH YOUR PURCHASE.**

ONLINE VIDEOS: View online videos of all animals selling at www.cranviewgelbvieh.com or www.mms.bz.

HEALTH: All bulls and females sell as guaranteed breeders. Bulls have not been semen tested. Please have bulls semen tested prior to turning out for this breeding season, if you take home. Scrotal measurements and yearling weights will be supplied on the supplement sheet sale day. All animals selling will sell with a valid health certificate for shipment in the continental United States. Any special testing needed to get into certain states will be done by Cranview Gelbvieh prior to shipment.

TRUCKING: Cranview Gelbvieh is offering free nationwide trucking on all purchases of \$10,000 or more per ranch. For complete details please contact Rob Arnold of Cranview Gelbvieh or Mitchell Marketing Services.

GENOMIC ENHANCED EPDs

THE MAJOR BENEFITS OF GE EPDS ARE: risk reduction through improved accuracies, value of time to assess breeding stock at a younger age, increased rate of genetic progress, and getting data on economically important traits which are expensive or difficult to measure. Many of the bulls and females selling have GE EPDs and it is denoted just below the EPD box in the sale book.

SALE BOOK EPD EXPLANATIONS

CALVING EASE DIRECT (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled in his herd.

BIRTH WEIGHT (BW): Predicts the difference, in pounds, for birth weight of the calf.

WEANING WEIGHT (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

YEARLING WEIGHT (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

MILK (MILK): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

TOTAL MATERNAL (TM): An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. As an index, this value is not reported with an accompanying accuracy. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. TM Index = MK EPD + 1/2 WW EPD.

CALVING EASE MATERNAL (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic pre-disposition to calve unassisted as heifers.

YIELD GRADE (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

CARCASS WEIGHT (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

RIBEYE AREA (CREA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

MARBLING (MARB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

FEEDER PROFIT INDEX (FPI): An economic selection index designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on grade and yield. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.

ARE YOU UNABLE TO MAKE IT TO RUGBY ON SALE DAY? BIDDING IS AVAILABLE ONLINE!

To view or bid at the Cranview Gelbvieh Production Sale:

- Log on to www.dvauction.com
 - Register to create a user name and password
 - Fill out banking information
 - Click Apply for Bidding and select Cranview Gelbvieh
You must have high speed internet access to bid.
- Questions? Please call PH: 308.870.3661.

BIRTH WEIGHT IN EMBRYO TRANSPLANT (ET) BULLS SELLING

The bulls selling as a result of ET all have Genomic EPDs listed in the sale book to increase the accuracy. ET calves do not have ratios for birth and performance weights as they are raised by a recipient cow that will not give you the true accuracy for birth and performance as will the genetics. The birth weight in ET calves is completely irrelevant and has no indication as to the expected birth weights of their calves. Please use the EPDs for calving ease and birth weight to help with the selection of the bulls in the sale offering.

SUGGESTED USE FOR GELBVIEH and BALANCER® EPDS	TRAIT:	EPD WEIGHT RANGES:	EPD WEIGHT RANGES:	EPD WEIGHT RANGES:

CRAN G56 ET • SELLS AS LOT 1

SONS OF FHG FLYHING H GRAND SLAM 128D ET • LOTS 1-3

WOW! Best way to describe Lots 1, 2 and 3. G56 & G70 are true herd bull prospects. It's extremely difficult to find the volume, mass and muscle expression G56 shows off. He gives true meaning to the NUTS, BUTTS and GUTS expression. Even though G56 is impressive, G70 is equally impressive in his own way. Again, he possesses the presence of a herdbull candidate and offers much of the same as his brother. These are the first calves from D642 but there will be many more. Good bulls come from good cows and she is awesome!

JACKPOT SONS • LOTS 4-11

In my footnotes on the herd bulls, I stated that Jackpot does more things right for the breed than any other bull I have used. He excels in 9 or more EPD categories to include many of the carcass characteristics. If your goal is to produce cattle that will smash the scales at weaning; and, grade Choice or better; these bulls have the potential to accomplish just that. See my note regarding the Jackpot females. Be sure to take a serious look at this group...there are a number of standouts to include G06, G13, and G30!

This group of bulls is the reason Balancer bulls continue to gain popularity with so many commercial cattlemen. The industry likes the smaller heads for potentially easier calving than traditional higher percentage cattle, the cleaner front ends with less brisket that the industry has demanded, and the ability for these bulls to sire calves with more performance than straight Angus bulls to put more money in every commercial producers pocket. Our long-term goal is to bring these characteristics to every bull that sells in this sale. Most of these Whitlock & Lifeline bulls could be used for heifers or 1st calf cows.

SONS OF DDGR JACKPOT 95D • LOTS 27-37

We bought this Noble Man son to put a shot of performance back into our Balancer females in our breed up program. Not only does he infuse a shot of performance, he has been very consistant in improving carcass traits. A common characteristic in these Noble Man bulls is usually very good scrotal measurements which usually indicates better fertility in females. The G77 bull was a standout in this group all year long.

Overdrive appears to sire cattle that are structurally correct with exceptional muscle expression in a nice cherry red package. Check out the three Overdrive females; they are very attractive breeding pieces. While you are looking at those females, check out the picture of the female Casey Martin purchased in our 2019 sale. This bull will sire cattle you'll love to show off.

Big and Stout set of bulls. Otto X7 cattle exhibit a lot of muscle expression which complements the nice square hips in these cattle.

It's time for someone else to reap the benefits of this great cow. We purchased Zula Z133 in the ND State Sale from Doug Hille. No one could have predicted the impact she would have on our herd and the influence she would have on other herds. She has produced many sale topping females along with many bulls that have found their way into other states. The highest profile animal is the Overdrive female purchased by Casey Martin in the 2019 sale. Casey earned a National Reserve Cow Champion at the Jr. Nationals with her and a Gelbvieh Cow Champion Ribbon at the NAILE this past fall. Congratulations Casey! Two daughters, C554 selling to Warner Beef Genetics for \$7,500 and E757 selling to Shad Ludeman for \$6,000 topped previous sales. She has also added many females to our herd including C557 which had many friends when we showed her...check out her Overdrive and Powerbuilt calves in this offering. If you are looking to add an exceptional female with a proven track record, invest in this great female. She is open and ready to flush or breed.

CRAN G985 ET • SELLS AS LOT 54

DAUGHTERS OF WOHL OTTO X7 • LOTS 54-59

This is a great set of full sisters out of the very popular Z133 cow. She has produced many of the sale topping progeny that have gone through this sale in the past 5 years. Otto X7 was a bull we appreciated for his muscle expression and his square hips. Based on their EPDs, it appears that everything is in place to make these females productive for a very long time to include heifer pregnancy and PG30 which are key to getting heifers off to a great start. They rank in the top 10% of the breed for milk which is key to producing those big scale breaking WWs. Lots of mating possibilities with these 3/4 blood females.

CRAN FIONA F812 ET • 3/4 SISTER TO LOTS 63-65

Champion Female | 2019 NAILE Open Show
Res. Champion Female | 2020 NWSS Jr. Show
Congratulations Casey Martin, IL

DAUGHTERS OF CIRS OVERDRIVE • LOTS 63-65

If you look at our entire group of females, it is very easy to lock in on these three Overdrive females. They are moderate in their stature, they have a ton of rib, and they are feminine in their appearance. For those of you that saw 557C when we showed her, these heifers are very very similar. You have to appreciate the easy doing appearance these heifers display as 3/4 Gelbvieh heifers. These heifers are 3/4 sisters to the female that Casey Martin purchased in this sale last year and successfully showed in the Jr National Show where she stood Reserve Champion Gelbvieh heifer and Naile Show in Louisville where she was crowned the Champion Gelbvieh Heifer. She is pictured here along with these heifers mother. I think you will agree that these 3 heifers will carry on the great cow tradition.

CRAN G915 • SELLS AS LOT 66

LOTS 66-70

The three Whitlock heifers, the Believe heifer, and the Profitbuilder heifer offer a ton of value from both a genetic perspective and a phenotypic perspective. If you take a look at my notes on the Whitlock bulls, the same thoughts apply as to why these Balancer cattle are so popular with both seedstock producers and commercial producers. Be sure to check out the EPDs on all four. G915 is as good of a female as we have offered for sale. She is a moderate heifer that is just a GREAT cow prospect! She ranks in the top 10% for marbling and CW which is one of our main objectives as we continue our breed up program. She looks as though she will be a very easy keeping kind of female, and she is about as quiet as they come if some young kid wants to tackle a halter project. If you are focused on breed improvement or just want to add some quality females to your herd, these 4 will not disappoint.

DAUGHTERS OF EGL ROUNDHOUSE B019

LOTS 71-72

Those of you focused on carcass traits, consider checking out these two Roundhouse heifers. Along with phenotypic criteria, we continue to select females that will advance the genetic makeup of our herd as it relates to carcass values. Our goal is to keep our commercial customers in the lead with industry genetics and one of the keys is to start with good momma cows.

We are giving you ONE opportunity to purchase a heifer from this mating. Our genetic pool continues to add females with this genetic potential. Z256 is an 8 year old female and she has never missed putting a calf in this sale. Look at the balance this heifer possesses. Every single EPD is in the top 20-50% of the breed. Allows a person to be very flexible with your breeding options. Buying genetics from predictable females is always a good place to start or add genetics.

Jackpot females may prove to be some of the best females before its all said and done. Usually, the sires or great females are dead and gone long before we ever figure out how good the females actually are. That will certainly be the case again, as Jackpot decided to leave us this past summer. Jackpot continues to post EPD's that are in the top 30% of the breed to in many categories to include most of the carcass traits along with performance and milk traits.
