

The Northern Maternal Focus

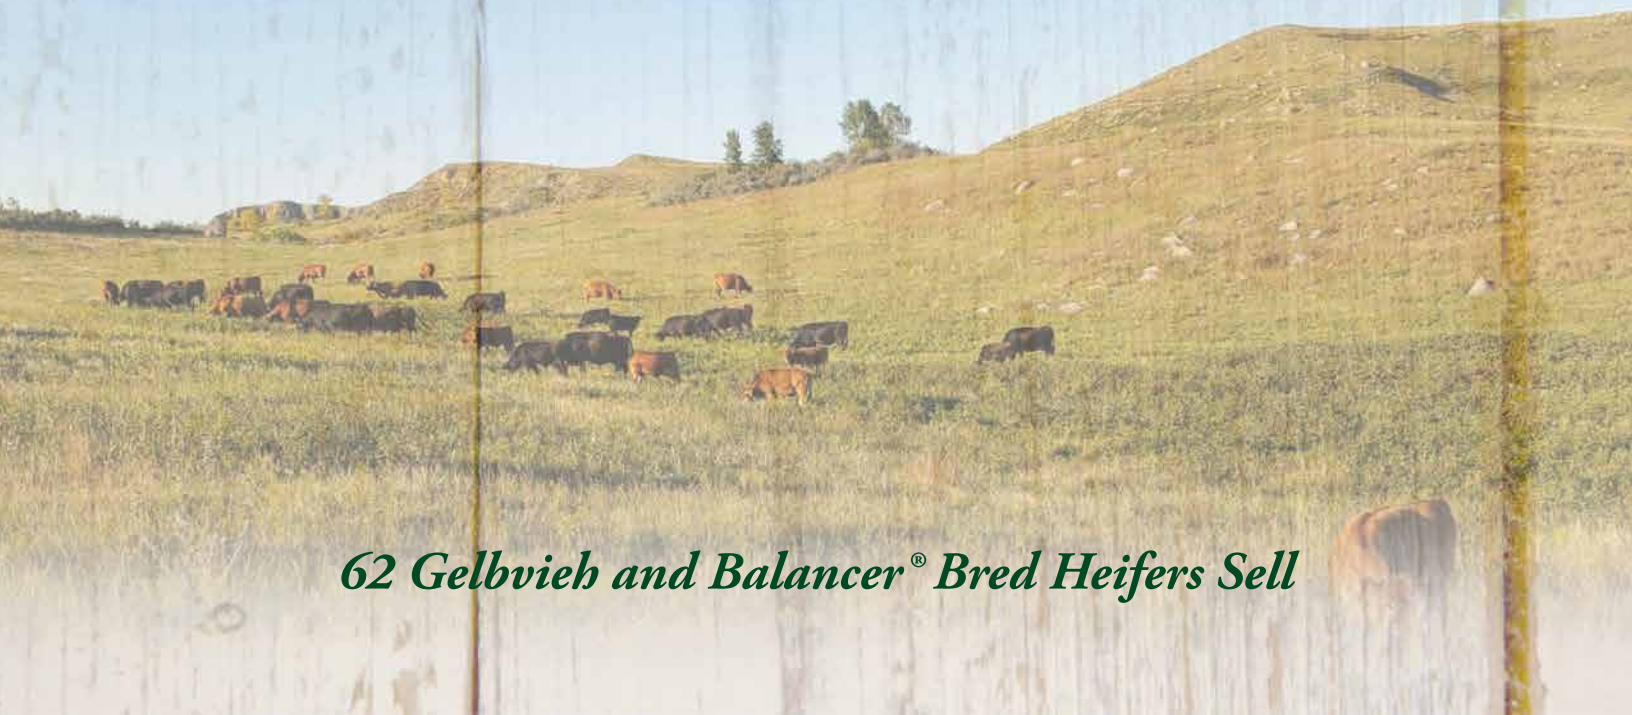

Premier Offering of All Chimney Butte Ranch AI Bred Heifers

SATURDAY, NOVEMBER 21, 2020

1:00 PM CST || Chimney Butte Ranch Sale Facility || Mandan, North Dakota

Quality Gelbvieh Seedstock

62 Gelbvieh and Balancer® Bred Heifers Sell

Welcome to the sale...

"THERE IS A TIME FOR EVERYTHING" Last year we began to downsize our operation with our first bred heifer sale. Since the sale we have had communicated with many of our customers. It was very satisfying to receive so much positive feedback from both previous and new customers. As we continue to scale back we realize the best legacy we can leave the cattle industry and the Gelbvieh breed, is to put top shelf, Chimney Butte genetics, to work in several herds throughout the industry. These heifers have been culled hard since birth, every one we are offering is good enough to come back to our herd. These are genetic packages that were destined to keep our herd moving into the future. We are offering every A-I bred heifer we have for this sale. Nothing held back. This is the only way we can assure our customers that they are being offered our best genetics. All animals were pregnancy ultrasounded with fetal age and sex by Mandan Veterinary Clinic on August 26, 2020. A-I of the heifers was over 3 days, June 2, 3, and 4. Using the 285 day gestation table, approximate due dates are March 14, 15 and 16.

All the heifers were raised and bred on this ranch. Nearly every heifer has several generations of females that have worked in our herd. Some of the heifers are A-I sired, some are ET calves. We held no A-I heifer back.

As we become more experienced in life, in other words, we get older, I can relate to a statement an older customer made to me, many years ago. "EACH YEAR THE CATTLE GET QUICKER, AND THE FENCES GET HIGHER". With that in mind, we will cull anything that does not have an attitude or disposition for us to work with safely. These are not pets and they run in large pastures with little human contact most of the time. We reserve the right to cull any animal up to sale time. Culled animals are sold for slaughter. Gelbvieh cattle have historically been a docile breed, and finally other breeds are recognizing this as a very important trait.

The heifers were brought in from pasture in early October. They are on free choice long hay and 2 pounds of corn a day. The corn is hand carried to the feed bunks, we feel this is a good way to introduce human interaction with the animals. They have received Preg-Gard before breeding, and have had free choice salt and mineral available at all times. For a complete description of our herd health program, please refer to our website, www.chimneybutteranch.com, for details.

Over the years our females have been accepted and are working throughout most of the United States. We have also placed animals in Mexico and Canada. We have always embraced the management philosophy of "THE PROCESS OF CONTINUOUS IMPROVEMENT." We have worked hard to create a reputation for honest hard working females that will adapt to most environments. Our mission has been and continues, "TO PROVIDE GENETICS THAT HELP INCREASE OUR CUSTOMERS PROFITS."

New sale location will be at the ranch this year. We are located 22 miles south and west of Mandan, ND. Our address is 3320 51st street, Mandan, ND. 58554. Directions to the ranch from the south, north, and west will be detailed in the catalogue. Use GPS with caution, as some systems will send you on a very interesting drive.

To help in your selection, we have a tool chest of tools to help you. The tools include, performance data, pedigrees, genomic enhanced EPDs, videos, pictures, catalogues and most certainly, direct communications with us, text, phone or e-mail. Please take time to review this outstanding offering and let us know how we can help you. DV Auction, phone bids, and third party bidders will be available to those who cannot make it in person to the sale. We will work hard to make your purchase a very satisfying experience. YOUR COMPLETE SATISFACTION IS IMPORTANT TO US.

GOD BLESS,
Doug, Carol, and Family

Sale Location: Chimney Butte Ranch

Genomic enhanced EPDs. A special heifer to us. Her mother is one of the last Majesty daughters still in production, and a flush mate to the X107 bull we raised, with a weaning ratio of 105 she should have been a dam of merit or distinction, but she broke her ankle just before breeding as a heifer and we held her open for a year to heal up. The heifer herself is outstanding, the video and picture shows more than I can describe. This female is for the breeder serious about herd improvement. Take an extra look. AI'd on 6-03-20 to DBGR Mr Destination 931G (1452508). Safe to AI, due 3-15-21 with a bull calf.

Genomic enhanced EPDs. Her maternal pedigree has both Upgrade (Granite) and Tye influence. Both of these have produced many good females for our herd. Powerful numbers and a bull calf coming from the 931G bull. This female is a good opportunity. AI'd on 6-02-20 to DBGR Mr Destination 931G (1452508). Safe to AI, due 3-14-21 with a bull calf.
