Greetings,

Welcome to our 17th “Genetic Progress” production sale. It’s always a great pleasure to invite both new and repeat customers to this event.

It’s been a very difficult year in our communities, our country and our world; and, I am hopeful of better days ahead soon. The events of this past year have not stopped us in our pursuit to bringing better cattle to you and the industry. I believe the top end of these bulls are the stoutest set of calves ever raised here at our farm.

Our goals continue to revolve around customer profitability...even in tough years. In our eyes, this means you need:

- I. A great maternal factory (Gelbvieh genetics lead the way)
- II. A live calf
- III. Calves excel at growth
- IV. Calves must be efficient
- V. Carcasses need to be industry acceptable (guarantees buyer competition for your calves)

Using these goals to drive genetic improvement decisions is our belief in keeping all customers on a progressive path forward. We continue to use Embryo Transplant, artificial insemination, and natural service sires to accomplish these goals.

For those of you using EPD’s to drive your decisions, which we strongly recommend, we continue to invest in DNA testing for every animal in our sale. This is a way to validate and improve accuracy of the existing EPD’s for every animal and to confirm animal’s parentages. Without doing this, all ET flush mates would have the same EPD’s.

We do everything we can to make our cattle work for you. We pay strict attention to all the convenience traits that make the cattle business easier to include disposition, structural soundness, feet & udder quality. We are extremely proud of the fact that our cattle have gone into different environments across the US and performed very effectively.

As always, in the event something does happen, we guarantee our animals through the first breeding season.

Again, thank you for your confidence and your continued support in our program. Please feel free to reach out with any questions.

Sincerely,  
Rob, Bill & Noah Arnold

# GENETIC PROGRESS BULLS AND FEMALES

CRANVIEW GELBVIEH IS RETAINING 50% SEMEN INTEREST IN ALL BULLS SELLING. BUYER GETS FULL POSSESSION AND 50% SEMEN INTEREST WITH YOUR PURCHASE.

**ONLINE VIDEOS:** View online videos of all animals selling at [www.cranviewgelbvieh.com](http://www.cranviewgelbvieh.com) or [www.mms.bz](http://www.mms.bz).

**HEALTH:** All bulls and females sell as guaranteed breeders. Bulls have not been semen tested. Please have bulls semen tested prior to turning out for this breeding season, if you take home. Scrotal measurements and yearling weights will be supplied on the supplement sheet sale day. All animals selling will sell with a valid health certificate for shipment in the continental United States. Any special testing needed to get into certain states will be done by Cranview Gelbvieh prior to shipment.

**TRUCKING:** Cranview Gelbvieh is offering free nationwide trucking on all purchases of \$15,000 or more per ranch. For complete details please contact Rob Arnold of Cranview Gelbvieh or Mitchell Marketing Services.

## GENOMIC ENHANCED EPDs

**THE MAJOR BENEFITS OF GE EPDS ARE:** risk reduction through improved accuracies, value of time to assess breeding stock at a younger age, increased rate of genetic progress, and getting data on economically important traits which are expensive or difficult to measure. Many of the bulls and females selling have GE EPDs and it is denoted just below the EPD box in the sale book.

## SALE BOOK EPD EXPLANATIONS

**CALVING EASE DIRECT (CED):** Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled in his herd.

**BIRTH WEIGHT (BW):** Predicts the difference, in pounds, for birth weight of the calf.

**WEANING WEIGHT (WW):** Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

**YEARLING WEIGHT (YW):** Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

**MILK (MILK):** The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

**TOTAL MATERNAL (TM):** An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. As an index, this value is not reported with an accompanying accuracy. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. TM Index = MK EPD + 1/2 WW EPD.

**CALVING EASE MATERNAL (CEM):** Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic pre-disposition to calve unassisted as heifers.

**YIELD GRADE (YG):** Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

**CARCASS WEIGHT (CW):** Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

**RIBEYE AREA (CREA):** Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

**MARBLING (MARB):** Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

**FEEDER PROFIT INDEX (FPI):** An economic selection index designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on grade and yield. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.

## ARE YOU UNABLE TO MAKE IT TO RUGBY ON SALE DAY? BIDDING IS AVAILABLE ONLINE!

To view or bid at the Cranview Gelbvieh Production Sale:

- Log on to [www.dvauction.com](http://www.dvauction.com)
  - Register to create a user name and password
  - Fill out banking information
  - Click Apply for Bidding and select Cranview Gelbvieh
- You must have high speed internet access to bid.  
Questions? Please call PH: 308.870.3661.

### BIRTH WEIGHT IN EMBRYO TRANSPLANT (ET) BULLS SELLING

The bulls selling as a result of ET all have Genomic EPDs listed in the sale book to increase the accuracy. ET calves do not have ratios for birth and performance weights as they are raised by a recipient cow that will not give you the true accuracy for birth and performance as will the genetics. The birth weight in ET calves is completely irrelevant and has no indication as to the expected birth weights of their calves. Please use the EPDs for calving ease and birth weight to help with the selection of the bulls in the sale offering.

## RIGHT COMBINATION SONS • LOTS 4-11

I will say without a doubt, this group of bulls is the stoutest set of ET bulls we have ever raised. When it comes to performance, you can walk through the pen of these 4 bulls and easily imagine what a set of steers would look like sired by these bulls. The wide tops and the heavy muscle expression are both good indicators of strong performance.

## CRAN 04H Sells as Lot 1

Breeding cattle is sometimes more luck than art. Regardless of how you get there, it's really a good feeling when it all comes together; and, it can be replicated as it has with this flush. I like the entire package this bull presents from the numbers to the actual phenotype. It's been said that we may have lost some of the performance in our balancer cattle compared to our PB counterparts; I would beg to differ seeing this set of calves. Plus, we have cleaned up so many things the industry has discounted Gelbvieh cattle for over the years. He is in the top 15% for WW, top 25% for YW, top 15% for PG30 (good indicator that the heifers will stay in the herd), top 3% for scrotal (scrotal circumference is a good indicator that he will sire daughters that will begin cycling earlier) and in the top 50% on 4 of the 5 carcass traits. His momma (CRAN D642) is the thickest female we have ever raised; many people that saw her at 12 months of age thought she was bred. So, he comes by his volume and thickness naturally on both sides. When you get behind this calf, he is undoubtably impressive. But, when you put that together with his overall mass, his small head, his gorgeous phenotype, and his ability to move extremely well; you have a darn good herd bull candidate.

**CRAN H01 ET • SELLS AS LOT 4**

## Lot 4 CRAN H01

This calf shares the same dam as lot 1. In fact, 5 of these ET bulls, share D642 as their dam. Obviously, momma has a lot to say about the outcomes and this momma cow is quickly earning our respect as our best momma when it comes to thickness and performance. She had the thickest bull in the pen in 2020 selling to Jeff Swanson in NE, and she has followed that up in 2021. The heifer mate to this bull is a picture perfect image of her mom. Its hard to say which one of her babies is the best; but this calf will get your attention. Like his 1/2 brother lot 1, he is extremely thick and packed full of red meat. He has an extremely balanced set of EPD's (11 of them in the top 50%); so, pretty easy to stay out of the ditches with this bull. We think this bull has a lot to offer. We will plan to use him in our program.

## SLC VIPER 7E SONS • SELL AS LOTS 4-5

The sire of these two calves, Viper, was the highest selling Gelbvieh bull in the 2019 National Sale selling for \$80,000 to Little Windy Hills Farm. Given the fact that Viper is extremely high on both CE and BW, I would expect these bulls to be a little better on calving ease than the EPD's are predicting and maybe not quite as much performance as the Right Combination bulls, but that is splitting hairs. They both are Homo Polled and H01 is also Homo Black!

**CRAN H05 ET • SELLS AS LOT 5**

**CRAN H06 ET • SELLS AS LOT 6****CRAN H06 Lot 6**

Same sire Lots 1-3, different donor dam. We purchased 402B from Plateau Gelbvieh in the 2016 National Sale to compliment our focus on improving carcass value in our Gelbvieh cattle. She checked several boxes for us...her phenotype and her EPD's, as well as being a Dam of Merit. This mating worked extremely well phenotypically and on paper. This calf is in the top 25% for weaning, top 35% for Yearling, top 10% for milk, top 10% for TM, top 3% for Scrotal, and top 25% on 4 of the 5 carcass values. Make sure you check out the heifer flush mate to this bull...She could easily stand a ton of competition in the pasture and the ring.

In analyzing these 95D bull calves, we can say without a doubt that they all excel at growth and they all will contribute to the maternal side of the equation. So, if you are planning to retain females in your herd this group of bulls would be an excellent choice."

This is the last natural sired calf from the Jackpot 7551B bull. We will continue to produce these calves through AI & ET as these genetics are some of the best maternal & carcass contributors to the Gelbvieh herd. This calf ranks in the top 1% for milk, total maternal, and Carcass Weight. All of this contributes to more profit at the end of the day.

We have used Mighty Hot selectively on our heifers the past few years and have had extremely good luck with him. This calf ranks in the top 5% for growth EPD's and also very high on maternal EPD's. He is in the top 20% on 7 of the 8 Carcass & Intake EPD's. Ranks in the top 3% for feeder Profit Index and top 3% for Efficiency Profit Index. What does this all mean? It means if you had a truck load of steers sired by bulls like this...guys buying feeder calves would be all over these!

## CRAN POT COMMITTED F11 ET • SIRE OF LOTS 22-29

Can't say enough about these Pot Committed calves. After we purchased jackpot 7551B, I purchased some semen on the same bull that sired 7551B in hopes of creating another bull to add to our own lineup. Well, Pot Committed F11 ET is that bull. These F11 bulls, offer a lot of good qualities to the commercial producer. Carcass qualities you won't find in most Gelbvieh, performance, and maternal. So, whether you want to produce better beef and more of it; or, if you want to keep a few new factories around each year...these bulls are a great choice.

# BALANCER®

## Gelbvieh x Angus or Red Angus

### ADDING THE POUNDS

Steers in the 2018 AGA Scale and Rail Contest had an average daily gain of 4 lbs. per day in the feedyard.

### MAKING THE GRADE

Many feeders have reported Balancer-sired cattle that grade 90% Choice or better.

### DELIVERING THE VALUE

Gelbvieh ranks #1 for percent retail product according to U.S. Meat Animal Research Center progress report #22.

## PROVIDING VALUE ON THE RAIL

Carcass data from 302 head of 2016-born Balancer steer and heifer calves fed in Amherst, Nebraska, and harvested at Tyson Fresh Meats in Lexington, Nebraska, prove Balancer cattle are the smart choice for feedyard profitability. These Balancer-influenced calves averaged 98% yield grade 1, 2, or 3, and 98% Choice and Prime quality grade.

**"These Balancers are one of the best kept secrets in the cattle industry."**

-Adam Sindt, Riverview Farms, south-central Neb.

**DEER VALLEY GROWTH FUND SONS • SELL AS LOTS 30-31**

Growth Fund bulls have topped sales all over the country this past year. Once you know that the sire to Growth Fund is Basin Payweight, you will understand where these calves get their added punch. I appreciate these calves for their ability to check all the boxes when it comes to commercial indexes. Both of these calves rank in the top 50% for all 6 Indexes with both of them ranking in the top 10% on 3 of the indexes... indexes are the commercial cattleman's best friend! If you don't use EPD's...use the indexes as they will continually move your herd in the right direction.

Exciting young Monumental calf sired by the popular ABS EXAR Monumental 6056B. Monumental was the "People's choice" of the 2017 National Western Grand Champion Carload of Bulls. You won't find many Angus bulls that combine calving ease with explosive growth and then pull it all together with carcass characteristics that this bull possesses. If you do, Angus breeders from everywhere are chasing the same bull. He scores in the top 15% on 5 of the 6 \$values in the Angus Breed! If you need an Angus bull, this is a good one!

### CRAN H001 ET • SELLS AS LOT 35

This heifer is striking in so many ways. I don't think there is any question, this heifer is going to get it done in the pasture. But, she is good enough to get it done in the ring as well. At 15 below zero, we weren't spending a lot of time looking for the perfect pose but she gave us a pretty good look. These Right Combination cattle have a very strong top in them and is evident by their CW & CREA EPD's which are in the top 25% of the breed; check out the flush mates in the bull pen. This heifers mom was purchased in the National Sale from Plateau Gelbvieh and she is definitely helping us put our genetic puzzle together. She excelled at YG and CREA and she is definitely passing those pieces on to her three heifers in this sale. She has also achieved Dam of Merit status this year.

A full sister to Casey Martins heifer that he purchased in our Genetic Progress Sale in 2019. She was shown successfully as Grand Champion Female at the North American Livestock Expo in Louisville, KY, Reserve Grand Champion Female at NWSS Jr Gelvieh Show and Grand Champion Female at the Iowa State Fair.

Her Dam, Zula Z133, has been a top producing donor for us over the past few years. The Zula progeny excel with eye appeal, volume, growth and maternal traits.

Lot 36 is a strong and very attractive heifer with a very bright future as a show prospect or production female. You have an opportunity to purchase from our top cow family with high quality.

CRAN H009 is an outstanding show prospect and cow prospect. We purchased this heifer's mom from Plateau Gelbvieh in the National Sale and she has been a great genetic breeding piece to our puzzle. This heifer is in the top 45% of all Intake & carcass traits and she is in the top 50% on 9 of the 12 Growth & Maternal traits. We are sharing a few of these Jackpot 7551B ET heifers as we have full sibs. The best part of this heifer she is 75%. She can be shown in either the PB group or the Balancer group...you decide. From a breeding piece, a lot of choices. As stated in lot 35 footnote, Destiny 402B is a Dam of Merit.

A lot to like about this group of heifers if you are looking to build a cowherd or add some different genetics to an existing cowherd. As a group, these heifers represent the group with the best calving ease genetics in the offering. You will also find that almost everyone of these heifers exels at Intake and carcass characteristics... I believe everyone of them has 6 of the 8 EPD's in the top 50 percentile. Like every other good bull, you really don't find out how good these girls are till the sire is dead

Maternal Grand Dam, LN009, is a Dam of Distinction

Noah purchased this heifer's mother from Gustin's Diamond D. She is above breed average in 7 of the 8 Intake & Carcass EPD's AND she is above breed average in 6 of the growth & Maternal EPD's. A very complete PB female.

**CRAN H029 • SELLS AS LOT 46**

**DDGR JACKPOT 95D DAUGHTERS • SELL AS LOTS 46-52**

I really don't need to say any more about this pen of heifers than **PERFORMANCE!** They all excel at CREA which is to be expected with true performance type cattle. Everyone of these heifers is Homo polled.

This group of heifers is the best group of heifers we have offered for both carcass and performance. If I told you that most of these heifers are in the top 10% of the breed for both growth EPD's, you would probably be interested; but, they also are in the top 25% for most carcass EPD's as well. In fact, you will find 3 heifers in this group that rank in the top 10% or better for marbling! Not only do they read good on paper, but they check all the boxes for phenotype. These are a complete set of females.

This heifer is the ideal spot for our program. She is 75% Gelbvieh Balancer allowing a lot of flexibility in breeding choices. She ranks in the top 50% for all carcass traits which is tough to accomplish; and she ranks in the top 10% for growth traits allowing for many breeding choices going forward. Appreciate the feminine look this heifer displays in her front end along with the muscle expression in her hind quarters. She will turn heads on sale day.

My choice of this heifer pen. We have flushed this heifer's mom several times and I can say with a high level of certainty, this will be a great cow! The Z256 cow is one of the best cows we have walking the farm today and I wish I had 100 more just like her. This heifer excels at all breed indexes, in the top 50% of all Intake & carcass traits, and, is in the top 15% on growth traits. Excellent cow prospect! Dam is a Dam of Merit.

When we first used Fillmore, he impressed us with his carcass characteristics which I believed we could build on in our cow herd. The females that we have kept, are looking to be the easy keeping kind. The females in this offering are stacked with enough performance and carcass traits to carry a program forward. His BV & CE numbers have improved with age...as with all good bulls, you never really know how good they are till they are gone.

## S WHITLOCK 179

REG: AAA17007891 Angus Bull

R&S EXPEDITION 1404  
S PRIDE ANNA 567

An awesome EPD profile, a valuable maternal pedigree and solid body type makes Whitlock an extremely unique sire. He offers mating flexibility that will pair well with daughters of the Angus breed's most popular sires. He is one of the Angus breed's elite sires for CW. He is a big time \$B bull. As I have watched the Angus breed, I have appreciated the Chisum cattle and this son has not disappointed us. We also use a Whitlock son for Natural Service.

**S WHITLOCK 179**

When I purchased this bull, I felt as though I purchased the best breed improvement piece I could find. His EPD's put him in the top 10% of the breed on 9 different categories and he still holds that today. Included in those 9, are performance & carcass, which are the two most influential revenue generators once the calf is on the ground. In fact, Jackpot 7551B ranks in the top 3% of the breed for Feeder Profit Index and the top 15% of the breed for Dollar Cow Index. If you are in the commercial business or the seed stock business, these animals have real industry value. These calves are impressive in their phenotype and genetic makeup. He is no longer in existence so only semen remains.

After we purchased Jackpot 7551B, we took one of our best females and mated to the same sire to create a potential companion with a little more carcass value. This bull ranks in the top 25% for all 3 Indexes. His influence in a balanced carcass portfolio should not be overlooked; and if you are looking to add performance to a set of cows this bull will do that. This is the most complete sire group in our offering. These females are awesome. They are stacked with performance, breed improving carcass traits, and exhibit a phenotype that is extremely easy on the eye.
