

BREEDER'S CHOICE

Gelbvick Bull Futurity

25th

ANNIVERSARY

Held in conjunction with Cattlemen's Congress

Sunday, January 2, 2022 || Oklahoma City, Oklahoma

GENERAL INFORMATION

The Breeder's Choice Bull Futurity was initiated by Gelbvieh breeders and supporters to increase participation in the National Gelbvieh Show, the National Gelbvieh Sale and to identify the most useful young sires in the Gelbvieh breed.

The sponsor of the annual futurity will be the Breeder's Choice Bull Futurity, Inc., a non-profit organization, not associated with the American Gelbvieh Association.

The Futurity winners will be selected by scored balloting of the participating breeder members. Ballots must have a different bull in 1st, 2nd, and 3rd positions. Ballots must include all three positions.

The consignor of the futurity winner shall receive the greater of approximately 80% of the net futurity funds or the net proceeds from the sale of the bull in the National Sale. Two runners-up will be identified to receive approximately 10% respectively of the net futurity funds.

The Futurity winner will be sold in the National Gelbvieh Sale. The lesser of the net sale proceeds of the winning bull or the net futurity proceeds will be given to one breeder/member who will be selected by a random drawing at the Futurity Social on Sunday night.

Each Futurity breeder member has the right to receive 20 (twenty) units of semen from the winning bull.

The voting will be held at the Jim Norick Arena Ring 1, Sunday, January 2, 2022, at 1:00 pm. The top 3 vote winning bulls in the initial voting will come back to the arena for a second voting to select and announce The Breeder's Choice Gelbvieh Bull Futurity Champion.

Breeder's Choice Gelbvieh Bull Futurity drawing will held at the Sheraton Oklahoma City Downtown Hotel, Sunday night, January 2, 2022, at the Breeder's Choice Futurity Social.

The 2022 Futurity is limited to 53 breeder memberships. We are selling 2 memberships during the Futurity Final Events at the Sheraton Downtown. Ace of Spades and 9 of Diamonds sell prior to the drawing. Buyers of the new memberships will be included in the drawing.

All bulls entered in the 2022 Breeder's Choice Gelbvieh Bull Futurity have been DNA tested for HD Genomic EPDs and are tested for the following genetic defects: AM; NH; CA; and DD. The winning Breeder's Choice Futurity bull is AI qualified and all tests have been completed to meet the AGA requirements for AI sires.

Futurity Champion Bull

Sells in the National Gelbvieh and Balancer® Sale

Tuesday, January 3, 2022 at 6:00 pm (ct)

Super Barn Sale Arena, Oklahoma City, OK

Schedule of Events

Monday, January 2, 2022

- 1:00 pm 25th Annual Breeder's Choice Bull Futurity
Jim Norick Arena Ring 1
- 6:00 pm Breeder's Choice Bull Futurity Meeting
Sheraton Downtown
- 6:30 pm Breeder's Choice Futurity Final Events
Peoples Choice Balancer Bull Futurity Finals
AGA Foundation Sale Credit Auction
Gelbvieh on Ice Sale
Sheraton Downtown

Tuesday, January 3, 2022

- 6:00 pm Breeder's Choice Gelbvieh Bull Champion sells
in the National Gelbvieh and Balancer Sale
Super Barn Sale Arena

Selling 2 Breeder's Choice Gelbvieh Bull Futurity Memberships

Selling Full Possession and 50% Semen Interest in the 2022 Breeder's Choice Gelbvieh Bull Futurity Champion

"OOPS SHE DID IT AGAIN"! Cow Power relates to Bull Power and this bull's dam is not short on any power. ProHart Brandy 516C just happens to be the dam of ProHart Ol' Glory, the 2021 Breeder's Choice Gelbvieh Bull Futurity winner. It is not often that a cow produces a bull of this caliber, but we are fortunate she just keeps making them better. Heavy Hitter 050H is pouring it on after his 2021 wins at Colorado State Fair and American Royal. His flawless structure starts out setting down on a big sound foot and he is so agile in his movement as well as loose in his joints. He combines that with exceptional body depth and correct muscle shape that ties into an especially level hip. 050H sire comes out of a herd that emphasizes sound functional cattle with Rock Star EPD's. Mr. Duramax 843F was selected out of the Rippe program and has not disappointed, stacking calves with sound breed topping EPD's. Heavy Hitter's moderate birth EPD's are backed by his 80 lbs. actual birth weight. Combining the birth with his power in growth that rank his EPD's in the top 2 and 3 % of the breed. He does not disappoint in the maternal numbers as well maintaining all his EPD's 35% and above topping with stability at 2% and PG30 at 20%. His intake and carcass EPD's maintain him as a profitable asset with 4% for carcass and 20% for ribeye. To complete the picture, he is in the top 5% for FPI. It is no surprise because Brandy 516C has as sound of a set of EPD's that you can find in the breed and is headed to our ET program. If you want to read his pedigree, some of the industry's top programs show up in his ancestors, Hojer, Judd, Flying H, Rippe, and if you follow the Brandy cow family, they originated out of the Broken Fork program. ProHart is humbled and honored to offer a bull of this caliber for your consideration for the 2022 Gelbvieh Breeder's Choice Futurity.

C-Cross Cattle Co is pleased to introduce our Inaugural Futurity Entry, C-Cross Manifesto J104! This Homo Black, Homo Polled TPG Frontrunner 2510F son brings Performance, Carcass, Eye Appeal, and proven genetics to the Ring for your evaluation. Numerous Breed Leading Sires, Dams and Programs have contributed to this genetic package. We believe Manifesto J104 has the potential to advance the Breed. He posts a 758 pound adjusted weaning weight from a 72 pound start up without creep and his gestational length was 279 days. His moderate Dam is a phenotypic masterpiece and stems from a long line of our most elite and productive cow families. His Dam, Granddam, and Great Granddam are still in production here in our program. We feel J104 brings together a rare combination of EPD's, Maternal, Carcass, Structure, Soundness, Eye appeal, and Predictability all in one package. We hope you appreciate our "Manifesto". Thank you for your consideration.

Post Rock Double Wide is a homozygous black homozygous polled bull that's bred and designed to moderate and soften up the purebred population. He is what his name implies, twice as deep and twice as wide as the majority of the purebreds available, and he does so in an extra eye appealing package. His dam is a result of a purchased flush opportunity from the featured 198L donor at Cedar Top Ranch, who's produced many influential individuals in the 135 progeny recorded in the AGA. Today's industry focus is on sustainability and at the ranch level it starts with moderate sized cows raising big calves. In Double Wide's case, it was him posting a 790lbs actual weaning weight at 211 days with his dam having a 1043lbs weight at weaning time for a 115 weaning ratio in an 81 head contemporary group. Double Wide is a true genetic outlier in his type and kind and is backed by proven genetics and maternal power.

18	-2	69	105	18	53	9	13.7	-0.14	37	0.57	0.09	76.22

When we lost this guy's sire Big Andy this summer it had us pretty down and as the calves have continued to grow it has been an even bigger bummer for us because we think he had a lot to offer to the purebred cattle in the breed and continue to help push for cattle with the right look and build to excel both in the ring and in production but also have breed leading EPD's. Even though we lost Big Andy way sooner than expected and have very limited semen on him we think this guy has what it takes to fill his dad's shoes and take things even a step further! Change of Pace offers the same power, body, added foot and bone that his sire brought to the table but does it in a neater, more attractive package and still has a very solid set of numbers. This guy nursed a picture perfect JRI Next Step daughter who not only made the move from SD to NC and changed to fescue but did so all while raising this guy to a very respectable 725 lb weaning weight and catching first time AI. If that doesn't spell out productivity and the ability to thrive and adapt no matter the environment then I don't know what does. Be sure to check this guy out as we truly think he is one that can do big things and help improve and move not only any operation forward but also make a lasting impact on the purebred genetic base.

Fertility is way overlooked in the beef industry and futurity members, fertility has been documented as 12 times more economically important than any trait in the beef industry. JRI Dr. Pol 253J400 offers you breed leading fertility and longevity genetics as his incredible 9-year-old dam JRI Ms Sugar Pie 253Z3 has been honored as a Dam of Merit/Dam of Distinction female in every year of eligibility ('16 thru '21). Rest assured, Dr. Pol's 9-year-old Dam of Distinction dam knows how to produce super stud sons. Dr. Pol's full brother JRI Pivotal Point 253H4 was a member of Judd Ranch's 2021 National Champion Pen of 5 Purebred Gelbvieh Bulls and yet another full brother JRI Pinnacle 253G41 ET was a member of the 2020 National Champion Pen of 3 Purebred Gelbvieh Bulls. Dr. Pol offers you the profit driven combo of unmatched fertility and longevity genetics, in one beef machine package.

BARG All IN 05J is a one of a kind! He is one we have noted for his style, performance, and his stout muscle expression across his top line and rear 1/3. He is super sound and big footed and gets out and moves with ease. His dam is a female we selected from Thunderstruck Cattle Company at the BHSS to utilize in the production of high percentage offspring. She expresses a perfect udder with just the right amount of milk. She has continuously placed a top end female in the replacement pen each year and we can now say she can produce excellent bulls as well. We have been working for many years on herd improvement and building back toward higher percentage offspring while utilizing genetics that will carry forward favorable traits that balancers possess. With this young sire we believe we have gone "All In" and have accomplished just that. We are excited to present ALL IN for your consideration.

We are excited for you to evaluate our entry to this year's futurity. DTK Jagged E227J is a bull that checks all the boxes from maternal to performance to phenotype. With an EPD profile hard to beat, Jagged is in the top 1% of the breed for WW, top 2% for TM, top 3% for EPI, top 4% for FT, top 10% for YW, YG, REA, ADG, and FPI, top 15% for MK, top 20% for CW and RFI and above average for CED, CEM, HP, PG30, DOC, SC, and DMI. Along with his EPD profile Jagged puts it together phenotypically. Sired by the \$100k total valued breed leader DLW Frontrunner 2510F, Jagged is a very stout fella with an attractive profile full of substance, muscle shape and depth of rib that moves out easy on a wide base. We look forward to your opinion of this outstanding bull that comes to you as a 'total package' that is sure to benefit your breeding program. Thank you for your consideration.

Rye Whiskey is a long spined, soft sided herd bull prospect that is correct in his structure and travels with fluidity and ease. He is an outcross to many pedigrees within the breed and is the product of combining strong productive cow families. His sire BABR 9300G is a bull we retained for in herd use and is a very powerfully constructed individual whose dam BEA 3127A has been a no miss herd bull producer for us and his granddam BEA 5038R is still in embryo production at the age of 17, the longevity in this cow family speaks for itself. The 9300G sired bulls are soft made with plenty of muscle mass, performance and length of body and the daughters are angular easy fleshing brood cow prospects. The dam of Rye Whiskey BABR 6219D has had three herd bulls to date that offer above average growth at weaning. We have utilized her in making both Balancer and Purebred genetics and is on track to be a star female in production. The consistency is in the cow family on both sides of this young herd bull's pedigree. Thank you for your consideration.
