Homozygous Black Homozygous Polled 75% Balancer Semen Packages

417 Justice could possibly be the very best sire we have raised at J and K Gelbvieh Farm to date. We strive to breed the complete package in bulls that will work in both seedstock and commercial herds anywhere in the country. We try to breed bulls that maintain a combination of calving ease, performance, carcass and eye appeal. 417 Justice has all of these in 1 package that we feel is an asset to the Gelbvieh breed. He is a high volume sire with excellent thickness, depth of body and fluid movement. He is owned with 16 Tons Cattle Co and we have used this sire for pasture breeding within our programs only. His offspring have an average weaning ratio of 103 and an average yearling ratio of 103.

His EPD strength is where we like to be within our program. He ranks in the top 1% for yearling weight, 2% for weaning weight and FPI, 3% for Docility, Total Maternal and Carcass Weight, top 10% for REA and top 20% for Marbling. This combination fits all industry desires.

Selling semen packages of 40 units for \$1600 per package. All semen is frozen and ready for immediate shipment following the sale. No semen will be sold on the open market. Semen package purchasers only, may purchase semen in the future on 417 Justice at \$15 per unit once all semen package purchases are fulfilled. You may lock in your package prior to the auction and packages will be offered in the Gelbvieh on Ice sale as well.

WARNER BEEF GENETICS, ARAPAHOE, NE**Offering choice of 3 full ET brothers to DLW TPG Frontrunner 2510F**

We have all seen that group of ET calves that you just can't help but to love and your favorite changes daily, this is our dilemma at Warner Beef. With that said, we are going to open the gate! There are 3 full ET fall born bulls nursing recip cows as we speak that you get to select from. Frontrunner was the talk of the 2020 National Western and spring sale season with a total valuation of \$102,000. He has proven to be a breeding bull that in his first calf crop has placed progeny to the very front of contemporary groups across the nation. We will wean these calves by April 1, 2022 and process the DNA prior to your selection. Selection must take place by May 15, 2022. This very well could be the breed phenom of 2022, get in early and stay in, as this selection could pay better than a Vegas slot machine. Buyer is responsible for all transportation cost.

WARNER BEEF GENETICS, ARAPAHOE, NE**DLW Ms Wardon 2510Z x Deer Valley Growth Fund Embryos**

Selling 4 conventional embryos with a guarantee of 2 pregnancies if implanted by a certified embryologist.

Tremendous opportunity to get into the leading edge of Balancer genetics. A mating of the high octane, breed leading Angus sire Growth Fund matched with the fabulous 2510Z donor at Warner Beef. Most notably 2510Z is the natural dam of breed giant DLW TPG Frontrunner 2510F. She also is the dam of other registered herdsires and future donor dams at Warner Beef Genetics and several across the country. We are extremely excited about this mating! If you want to make a splash in the Gelbvieh breed start with matings like this. Buyer pays embryo shipping cost.

50 units of semen on GHGF Man O' War F825

Buyer can take as many as they want but must take a minimum of 10 units. Shipping cost is the responsibility of the buyer

The first offering of semen to the general public on the syndicated \$57,500 valued National Champion, GHGF Man O' War F825! Here is one of the few chances to get semen on this stand out red sire who took the breed by storm while on the show road and he's only seemed to gain steam now that his first calves are hitting the scene! In his rookie calf crop, his daughters have been sale toppers, with females selling for \$17,500, \$15,000, \$7,500 & \$6,600; averaging well over \$5,000 on daughters to sale so far. His sons have been very well received as well with having one of the high selling yearlings in the recent Boys of the South Bull Sale for Butler Creek Farms. This 74% Gelbvieh sire is quickly proving that he has what it takes to push the breed forward and change them in one generation. Take advantage as this is only time until our online sale this fall that semen will be available on this breed changing sire.

BUTLER CREEK FARMS, MILTON, TN

Lot 5A embryos are a slam dunk if dark red purebreds are what you want! Lot A, Kali 282z x RWG Right Combination 5506. When we saw Right Combination in Denver a few years back the first cow I wanted to flush him to was 282z. We feel like these genetics could raise the bar for red purebreds in the bred. A couple calves have already hit the ground at Blackhawk cattle company that look to high performing cattle with look and balance. We have several coming here at Butler Creek this spring. Kali 282z owned by Butler Creek Farms Milton, Tn and Blackhawk Cattle Company of Oregon, IL. Selling 3 IVF non sexed embryos with a guarantee of 2 pregnancies per lot with a 4th and final embryo given to fulfill the guarantee.

BUTLER CREEK FARMS, MILTON, TN

Lot 5B is a highlight to the offering coming in on balancer side of things! Black-list has quickly become a popular name not only on the angus scene but within the entire cattle industry. Across multiple breeds Blacklist has been used heavily siring numerous high sellers for 5 and even 6 figures and multiple champions. Most recently the reserve percentage Simmental female at the North American. When you have cows that work why not produce genetics that are unique! We might add that these are sexed female eggs as well! Kali 282z owned by Butler Creek Farms Milton, Tn and Blackhawk Cattle Company of Oregon, IL. Selling 3 IVF sexed female embryos with a guarantee of 2 pregnancies per lot with a 4th and final embryo given to fulfill the guarantee.

Butler Creek Farms Embryos

Butler Creek Farms is truly honored to be a part of the first annual Gelbvieh on Ice! We couldn't think of a better way to join in on the excitement than by offering up choice of 3 extremely rare and unique matings! The cows that come to mind that are as proven as any in our program are Kali 282z and BCFG 207z1. Both of these females stem from cow families that have got the job done for decades. Within this opportunity the buyer has the chance to select both purebred matings or a balancer option or even take it a step further and times the money to own them all if you so choose.

Selling choice with the option to times the money and take 2 or 3 lots

Selling with a guarantee of 2 pregnancies per lot with a 4th and final embryo given to fulfill the guarantee.

The first buyer also receives as a bonus 10 free straws of RWG Seminole wind semen!

BUTLER CREEK FARMS, MILTON, TN

Lot 5C was put in this sale simply because the proof is back in the barn! BCFG 207z1 x General Patton was a mating we were confident would produce high percent, stout, functional cattle! Just take a look at the full sib flush mates tied in the stall! These 2 boys were named champion and reserve champion purebreds at the North American. If purebreds like these two guys don't excite you, you must not like good cattle regardless of bred or color! For us here at Butler Creek we have always been the kind to sell our best and bring it town to display! We couldn't think of a better way to honor that commitment to raising quality seed stock than making these eggs available for the first time. BCFG 207z1 is owned by Butler Creek Farm and Distler family of Sunview Farms in Missouri. Selling 3 conventional embryos with a guarantee of 2 pregnancies per lot with a 4th and final embryo given to fulfill the guarantee.

TJB Anissa 149X Embryo Matings

TJB Gelbvieh is offering the opportunity to create purebred progeny from one of the most admired females ever to roam the pastures of Chickamauga. TJB Anissa 149X is one of the most massive bodied females in a complete package you will ever find. At 11 years old, she still moves with extreme athleticism. She tracks wide and true and possesses a tremendous teat and udder structure. She has produced several females that have topped our sales as well as young females now entering the donor program.

TJB is offering choice of matings to both Hillsgdown Finnegan, as well as RWG Guilt Trip. Finnegan recently sold for \$70,000 in the Hillsgdown Dispersal. 4 conventional embryos and buyer is guaranteed two pregnancies if transferred by a certified embryologist. Guarantee is 1 embryo per pregnancy.

TJB Gelbvieh is also offering red genetics from TJB Blackbird 410B. She is a dark cherry red female with awesome power and thickness. She typically produces the stoutest calf in every crop. A picture is worth a thousand words and this picture of 410B will impress you. Here is another opportunity to capitalize on the proven genetic power of TJB females to make your higher percentage red Gelbvieh cattle.

Buyer is guaranteed two pregnancies if transferred by a certified embryologist.

DBRG Ms Twister 8167F ET

Donor Dam of lots 8 & 9 Embryos

Donor Dam Twister 8167F

The entire family is made up of donor cows for Rippe Gelbvieh. The granddam is 6044 who is the mother of Nevada and we flushed for many years. Her dam is 560C who has been a long time donor for us and produced a Purebred bull that Bar Arrow and Blackhawk purchased on last year's bull sale. 8167F was quickly put into our donor pen. She possesses great phenotype, proven pedigree, and is flat amazing in her EPD profile. Her sire, Twister has had a big impact on many herds especially Lazy TV where one of his sons Whirlwind produced many top selling bulls. The Donor dam of Twister is 2100Z who also produced Franchise 0247H that sold for \$18,500 to Cedar Top Ranch and Black Gold Genetics. 8167F ranks in the top 3% for Calving Ease, top 10% for both weaning and yearling weight. She also ranks in the top 2% for Feeder Profit Index and top 4% for Efficiency Profit Index.

RIPPE GELBVIEH, HUBBEL, NE**Mayor G443**

We purchased this Homo Polled and Hetero Black bull from Chimney butte ranch in 2020. He is very deep bodied, heavy muscled and sound structured. His sire Eminence recently passed making these genetics even more unique. Mayor stood out to us with individual ratio's of 90 for BW, 112 for both weaning and yearling weight. His EPD's are amazing all the way through. Ranking in the top 15% for Calving ease, top 20% for weaning weight and top 15% for yearling weight. He also ranks in the top 10% of the breed for Feeder Profit Index. The result of this mating will be a PB94, Homo Polled, and potentially Homo black calf that I feel will have the potential to have a long lasting impact on the breed. Selling 3 purebred embryos with a guarantee of 1 pregnancy if transferred by a certified embryologist. 1 replacement embryo is the guarantee.

RIPPE GELBVIEH, HUBBEL, NE**Poss Rawhide**

Rawhide is a rare individual who is already known by name for his unique Angus phenotype and foot quality. His authentic blend of presence, calving ease and superior performance is tough to rival. His sire combined with the backing of a lead donor at Poss Angus, Rawhide is the result of masterful mating. His dam captured the top weaning weight among her calf crop and is now one of the \$C leaders within the Poss herd. Rawhide's genetic excellence, index merit and attractive design fuses together to create a sire built for a stockman. Use Rawhide to move your herd in a positive direction for many traits. He ranks in the top 15% for calving Ease and top 3% for weaning weight, top 2% for Marbling, and top 1% for \$Combined. Selling 3 Balancer embryos with a guarantee of 1 pregnancy if transferred by a certified embryologist. 1 replacement embryo is the guarantee.

**JRI Ms On Cue 214B5****Donor Dam of lot 10 Flush Opportunity****JRI Ms On Cue 214B5 Flush Opportunity**

Ms On Cue has developed in to one of our top females over the years with her production record and quality of natural calves. She has a nursing ratio of 103 on her natural calves. Her calves maintain excellent depth of body, thickness and eye appeal as you will see in photos at the bottom of page. We are offering a flush opportunity to the bull of buyers choice with a guarantee of 6 embryos and 3 pregnancies. Buyer will receive all embryos up to 10 with the option to purchase any embryos over 10 at the prorated price of the flush. All flush and freeze costs are the buyers expense. All embryo shipping costs are the buyers expense. Buyer must provide semen and semen shipping cost for the flush to the bull of your choice.

Embryos must be placed by a certified embryologist for the the guarantee. 1 embryo replacement will be provided per pregnancy not taken in the guarantee of the flush.

CIRCLE S RANCH CHOICE OF DONOR FLUSH

CIRCLE S RANCH, CANTON, KS

Circle S Ranch Choice of Donor Flush

Our gates are open for the buyer to choose any donor female on the ranch for this flush opportunity. We exhibited the 2021 National Reserve Champion Pen of 3 Bulls and Heifers at the 2021 Cattlemen's Congress National Show. Dams of the 2021 show winners as well as many production females are available in this flush opportunity. Red or black Gelbvieh females and Gelford females are strong throughout our program and available for this lot.

We are offering a flush opportunity to the bull of buyers choice with a guarantee of 6 embryos and 3 pregnancies. Buyer will receive all embryos up to 10 with the option to purchase any embryos over 10 at the prorated price of the flush.

All flush and freeze costs are included in the purchase price. All embryo shipping costs are the buyers expense. Buyer must provide semen and semen shipping cost for the flush to the bull of your choice unless the bull you wish to use is a Circle S Ranch herdsire.

Embryos must be placed by a certified embryologist for the the guarantee. 1 embryo replacement will be provided per pregnancy not taken in the guarantee of the flush.

KARR Long Haul Princess E96A ET Embryos

There's a touch of guesswork that goes into lining up untested flush matings. Especially when flushing younger cattle & as-of yet proven herdsires. A little less than a year ago, when Brad & I went halves on this set of flushes we hadn't seen the first live calf out of the Riptide 930G bull. But, having done some leg work around purchase time I was fairly certain this was one I'd want to flush to. Just was uncertain of the cow. In a series of phone calls the months following Congress last year the opportunity to get in on KARR E96A came up. When we talk cows, the ability of a female to mark her offspring & consistently generate good ones sits high up on the wants list. Certainly not on the needs list, but it's without a doubt what we strive for as producers. KARR Long Haul Princess E96A seems to fit that bill just about as well as any 4 year old in the business. Trace her pedigree & there's little wonder as to why. Having tied next to a strong set of her offspring that January & seen more than a few salty ET calves on a March visit to Phillipsburg. I sure was excited to bring a few matings to the table. Ears to the ground here told us at least one needed to be purebred. Bigfooted, sound, with presence to spare and a set of data that speaks for itself the Jackpot 889F bull was a no brainer.

Here's your chance to pick the mating that best fits your program.

Offering choice of KARR E96A flushes. 3-grade 1 embryos with a guarantee of 2 pregnancies when placed by Certified embryologist. Maximum of 4 eggs total per package to fulfill the guarantee.

LARSON'S LOST RIVER LIVESTOCK, CLEARBROOK, MN

LRSF Nellie B119 x Danell Pay Pal 12H embryos

There are very few bulls sold each year who are able to create the amount of buzz the sire of these embryos has been able to make. Danell Pay Pal 12H was one of the highest selling bulls of the 2021 sale season generating a final price of \$33,000 and for good reason. With his outcross pedigree, tremendous power and eye appeal, excellent EPD strength and powerful cows backing him up, we identified him as the bull to rapidly move our program forward. There has been incredible interest in utilizing his genetics but up until now, he has not been offered on the open market. Couple his unmatched potential with the proven power of our Nellie B119 donor, and the results will be explosive. B119 is a four-time Dam of Merit award winner with lifetime progeny ratios of 98 BW, 109 WW 108 YW and 113 REA. The resulting progeny will be homo black, homo polled and 73.45% Gelbvieh and possibly your only opportunity to tap into Pay Pal genetics until 2023. Selling 3 conventional embryos with 1 guaranteed pregnancy. A 4th embryo will fulfill guarantee. Must be placed by a certified embryologist.

LARSON'S LOST RIVER LIVESTOCK, CLEARBROOK, MN

When Chris approached us about this sale, we knew we needed to offer some of our best genetics and this mating right at the top of our program. The donor behind these eggs is without a doubt our best red Gelbvieh cow and possibly one of the best red cows I've come across in the last few years. Her overall design and functionality are unmatched with absolutely perfect feet and rear leg structure, an excellent udder, tons of center body and all rolled into a neat, feminine package. Her production record is also fantastic and continues to improve with each calf crop. She raised one of our high selling bulls in 2021 going to Four-square Farms, Alberta for \$13,000 and the bull she has for our upcoming 2022 sale is our best red Gelbvieh bull and he's also a full sib to these embryos. The resulting progeny from these eggs will be 93.5% GV and with the red purebred Gelbvieh market being as strong as it is, you can buy with confidence knowing these calves will be highly sought after. Selling 3 conventional embryos with 1 guaranteed pregnancy. A 4th embryo will fulfill guarantee. Must be placed by a certified embryologist.

Ertel Cattle Co and J & K Gelbvieh Farm Embryos

CCRO Carolina Cool 2330Z Donor Dam of lot 18 Embryos

CCRO Carolina Cool 2330Z Embryos

2330Z has been a long standing donor in the Ertel Cattle Co program. She has 26 recorded progeny over the years within our program. She has maintained a 103 weaning ratio on her natural calves. We have sold bulls and females to seedstock and commercial programs. We are looking forward to this mating with Tehama Tahoe B767. This will give us another premier sire group for females retained in our program. The EPD combination with this mating is very impressive. Carcass and performance ranking near the top of the breed with acceptable calving ease for any program. Selling 4 conventional embryos with a guarantee of 2 pregnancies. Embryos must be placed by a certified embryologist for the guarantee. 1 replacement embryo per pregnancy fulfills the guarantee.

JKGF Jacey C15 Embryos

C15 has emerged as one of the top production females in our program. We sold her only son to Holste's Triple H Farms in Iowa and have retained 2 daughters in our program. We sold Jacey C15 to Coles Bend Cattle Company in 2021 as a donor in their program. We have strived to add and keep carcass in our program through the years. C15 ranks in the top 2% for marbling and FPI while maintaining performance in the top 10%. Her mating to Frontrunner 2510F should be the ideal mating with calving ease, performance and carcass ranking near the top of the breed.

Selling 6 conventional embryos with a guarantee of 3 pregnancies. Must be placed by a certified embryologist for the guarantee. 1 embryo replacement for each pregnancy not taken to fulfill the guarantee. All embryo shipping cost is buyers responsibility.

JKGF Horizon F825

Son of JKGF Jacey C15, Donor Dam of lot 19

Sienknecht Cattle Co and McIntosh Brothers Embryos

JEMG Lee Ann 650U Embryos

Lee Ann 650U is one of the top red production females in the breed. She is the dam of several AI sires and seedstock sires as well as many donor dams throughout the Gelbvieh breed. She has 87 direct progeny recorded with the AGA through the years. This homozygous polled donor is a household name from many breeders throughout the country. In 2021 she produced another AI sire that sold in Genetic Power for \$13,500. The mating to SAV Renown 3439 is very impressive in terms of the performance you will get with a black animal. There won't be many direct sons and daughters of this great donor up for sale as they are usually retained within a breeding program.

Selling 2 packages of 4 embryos with a guarantee of 2 pregnancies per package. Must be placed by a certified embryologist for the guarantee. 1 embryo replacement per pregnancy per package fulfills the guarantee.

MCINTOSH BROTHERS, GEORGETOWN, KY

LWHF Miss Twila 107C ET

Donor Dam of lot 21 Embryos

LWHF Miss Twila 107C has done a tremendous job for us. We don't flush a lot of cows here at McIntosh Brothers so if we do, we really like the cow a lot. Twila has certainly earned the right to be a donor. She has raised some of our top females each year she has been in production. Her daughters are very soft made, easy keeping and eye appealing. We have retained all her heifers in the herd to this point, we really love this cow family! When we decided to flush Twila we thought long and hard on a sire for the flush. We decided on Deer Valley Growth Fund one of if not the most exciting Angus bulls in the breed. Growth Fund offers a unique genetic package. He ranks in the top 25% of the breed for calving ease and at the same time top 1% for this growth traits. He truly has been a breed changer in the Angus breed and will certainly have a huge impact of the Balancer breed as well. We have calved some Growth Fund calves and have been impressed with the added performance and style. We believe this is going to be a great mating. Estimated parental averaged EPD's CE 14 BW -1.2 WW 87 YW 140 M 20 TM 64. Twila flushed 19 in this flush making it possible to let a few embryos go. Selling 4 embryos with a guarantee of 2 pregnancies. Embryos must be place by a certified embryologist for the guarantee. 1 embryo per pregnancy fulfills the guarantee.

Coles Bend Cattle Company Embryos

DCSF Post Rock Power Built 34B8

Full ET Brother to lot 22 Embryos

DCSF Post Rock Wilma 298Z8 ET Embryos

Lot 22 embryos are full ET sibs to Post Rock Power Built 34B8. Power Built was one of the heaviest used red AI sires in the Gelbvieh breed for 5 years and made a huge impact with quality for red genes. He was sold for \$26,000 in the 2015 Cowman's Kind Sale for Post Rock Cattle Co. Semen is limited and hard to find. A rare opportunity to purchase an embryo package of this mating. This embryo package is an opportunity to have a full ET mate to this popular AI sire.

Selling 2 embryos with a guarantee of 1 pregnancy.

Embryos must be placed by a certified embryologist.

The guarantee is 1 embryo. If an embryo is replaced the guarantee is fulfilled.

Shipping cost of the embryos is buyers expense.

COLES BEND CATTLE CO, SMITHS GROVE, KY

EHE Ms Twila's Focus W607 ET Embryos

W607 has 89 registered progeny to date. She has been a super producer for C-Cross Cattle Co and now Coles Bend Cattle Co. W607 is a direct daughter of the great Twila 223M2 donor female. This cow family has had a huge impact on the progress of the Gelbvieh breed for the past 15 years. Many top herdsires and dams stem from the powerful cow family.

The mating of Frontrunner 2510F to W607 is an outstanding mating that combines pedigree, quality, EPDs and eye appeal all in one very complete package.

Excellent opportunity to add homo black homo polled genetics to your program.

Selling 6 conventional embryos with a guarantee of 3 pregnancies. Embryos must be placed by a certified embryologist. 1 embryo per pregnancy if needed fulfills the guarantee.

EHE Ms Twila's Focus W607 ET

Donor Dam of lot 23 Embryos

TAU Ms. Deep Impact 126A 6023D Embryos.

She is the dam of JLEA Tops Down. Tops Down was the Champion Gelbvieh Bull at the 2020 American Royal, Champion Gelbvieh Bull at the 2020 National Junior Show, and the Supreme Champion Bull over all breeds at the Nebraska State Fair FFA Show. He was a feature in last years National Gelbvieh Sale in Oklahoma City, selling to 3L Gelbvieh in Missouri for \$10,000. He is doing very well in his first year of semen sales. This year 6023D raised a Balancer bull that went on to win Reserve Champion Bull at the Southern Hospitality Classic in Batesville, MS. 6023D was a class winner at the national junior show during her show career also. She has proven that she can send progeny to the winners' circle, the sale ring and the semen catalog!
Selling 1 package of 4 grade 1 conventional embryos with a guarantee of 2 pregnancies. Must be placed by a certified embryologist. 1 embryo per pregnancy is the guarantee.

POPE FARMS GENETICS, RAVENNA, NE

JLEA Therefore I Am Maternal Brother to lot 24 Embryos

The background of the entire page is a close-up photograph of ice cubes. The ice is translucent with various shades of blue and white, showing internal crystalline structures and some air bubbles. The lighting creates bright highlights and deep shadows, giving it a three-dimensional appearance. In the lower half of the image, there is a large, solid white rectangular area that covers the bottom portion of the page, partially obscuring the ice background.
