

2015 Post Rock Cattle Company Bull Supplement Sheet

Actual Scrotal measurements were taken during breeding soundness exam on March 7 or 9. At that time the bulls were treated for internal and external parasites with Cydectin and boosted with Vista3VL5 (IBR, type 1 & 2 BVD, leptospirosis, vibriosis, etc) Footrot (Fusoguard) and Pinkeye (Moraxella Bovis) vaccines in preparation for summer turn out. The bulls have had 4 rounds Vista 3VL5, 3 rounds of pinkeye and footrot vaccinations during their development.
